**Affidavit for 30 day temporary for test Electrical service**

It is understood that the temporary electrical approval by the City Building and Zoning Department given in connection with the building being constructed under Building Permit #: \_\_\_\_\_ at \_\_\_\_\_ for \_\_\_\_\_ is being given for testing the following systems in said structure:

\_\_\_\_\_  
 \_\_\_\_\_.

Sub-paragraph 4501.3(d) (3) of the South Florida Building Code permits approval for a 30 day temporary electric service connection for a non-residential facility by the electrical inspector if the wiring installation, apparatus, or equipment are found to be in a safe operating condition and provided as urgent necessity for electrical power exists. Under these circumstances, an application for temporary service must be made in writing by the electrical contractor, firm, corporation or owner requesting the temporary service connection to the public utility system or isolated generating plant.

Such approval is in no event to be considered a release of said structure for purposes of use and occupancy, and no occupancy shall be granted or permitted until final inspections have been called for and approved by the inspection divisions concerned, and an occupancy permit obtained.

The undersigned also understands that the temporary electrical service approval is subject to rescission and cancellation at the discretion of the Building and Zoning Department and will be disconnected if the building concerned is occupied before final inspections are approved and occupancy permit obtained.

I, \_\_\_\_\_, being first duly sworn, depose and say that I am the electrical contractor for the above described property and that the electrical installation as now existing will not create a safety hazard if temporary service is connected.
