

MIAMI SPRINGS OAKWOOD & EAST DRIVE STORMWATER & ROADWAY IMPROVEMENTS

SCOPE

The project is intended to provide water quality, stormwater management, roadway and landscape improvements, and beautification along the East Drive corridor from NW 36th Street to South Royal Poinciana Boulevard, as well as drainage improvements in Stafford Park and along Oakwood Drive. Additionally, the project will accommodate the **safety of pedestrians, cyclists, and motorists** by improving landscape features, roadway geometries as well as improving the stormwater management within the service area identified to reduce flooding in the area and thereby **reduce flood impacts** to private property and flood-related safety hazards to residents.
