## **FUTURE LAND USE ELEMENT**

### **GOAL 1: ACHIEVE THE FOLLOWING COMMUNITY CHARACTER:**

Miami Springs should be a residential community which offers the best possible residential environment consistent with its location and development history. Development policies should protect and preserve its single-family residential character and neighborhoods by maintaining an adequate supply of safe decent and affordable housing for its current and future residents. The planning horizon in maintaining these goals for the City shall be 2040.

#### **Objective 1.1 Future Land Use Categories**

*Maintain existing development and achieve new development and redevelopment consistent with the community character statement articulated as the Community Character Goal above and which:*

- 1) protects and preserves single-family neighborhoods as safe, decent and affordable residential areas; and*
- 2) otherwise coordinates future land uses with the appropriate topography and soil conditions and the availability of facilities and services.*

*This objective shall be measured by implementation of its supporting policies.*

#### **Policy 1.1.1**

The City shall enact and enforce land development code provisions which are consistent with the Future Land Use Map (Figure 1.1), including the land uses and the densities and intensities specified in Policy 1.1.8. The City shall maintain land use densities at levels which shall a minimum be sufficient to accommodate growth for a 2040 planning horizon.

#### **Policy 1.1.2**

Between enactment of this plan and adoption of the land development code referenced in Policy 1.1.1, the City shall regulate all development in accordance the Future Land Use Map (Figure 1), including the land uses and the densities and intensities specified thereon and the description of the requirements of those categories, all of which are incorporated by reference into this Policy 1.1.2.

#### **Policy 1.1.3**

The City shall enact and enforce land development code provisions governing *subdivisions, signs and floodplain protection*. Such provisions shall be consistent with this plan and with the applicable Florida statutory and

administrative code guidelines.

#### **Policy 1.1.4**

The City shall enact and enforce as part of the land development code a concurrency management system. The concurrency management system shall specify that no development permit shall be issued unless the public facilities necessitated by a development (in order to meet level of service standards specified in the Transportation, Recreation and Open Space, and Infrastructure Policies) will be in place concurrent with the impacts of the development or the permit is conditional to assure that they will be in place. The requirement that no development permit shall be issued unless public facilities necessitated by the project are in place concurrent with the impacts of development shall be effective immediately and shall be interpreted pursuant to the following:

##### *1. Measuring Conformance with the Level-of-Service*

Public facility capacity availability shall be determined by a set of formulas that reflect the following:

Adding together:

- The total design capacity of existing facilities; plus
- The total design capacity of any new facilities that will become available concurrent with the impact of the development. The capacity of new facilities may be counted only if one or more of the following can be demonstrated:

(A) For water, sewer, solid waste and drainage:

1. The necessary facilities are in place and available at the time a certificate of occupancy is issued, or
2. Such approval is issued subject to the condition that the necessary facilities will be in place and available when the impacts of development occur, or
3. The new facilities are guaranteed in an enforceable development agreement to be in place when the impacts of development occur. An enforceable development agreement may include, but is not limited to, development agreements pursuant to Section 163.3220, Florida Statutes, or an agreement or development order pursuant to Chapter 380.06, Florida Statutes (the Development of Regional Impact authorization).

In the case of water, sewers and solid waste, the formulas must reflect the latest population verses flows.

Design capacity shall be determined as follows:

Sewage: the capacity of the County sewage treatment system.

Water: the capacity of the County water treatment and storage system.

Solid Waste: the capacity of the County disposal system.

Drainage: The on-site detention capability and/or storm sewer capacity.

Roadways: The standard for measuring highway capacities shall be based on techniques that are compatible to the maximum extent feasible with FDOT standards. The measurement of capacity may also be determined by engineering studies provided that analysis techniques are technically sound and acceptable to the City engineer.

## 2. *Concurrency Monitoring System*

The manager or designee thereof shall be responsible for monitoring facility capacities and development activity to ensure that the concurrency management system data base is kept current, i.e., includes all existing and committed development. This data base shall be used to systematically update the formulas used to assess projects. An annual report shall be prepared. The City will adhere to the LOS, schedule of capital improvements, and public facility availability. The City shall establish joint processes for collaborative planning and decision making on population projections to accomplish coordination between the comprehensive plan and facility providers.

## 3. *Capacity Reservation*

Any development permit application which includes a specific plan for development, including densities and intensities, shall require a concurrency review. Compliance will be finally calculated and capacity reserved at time of final action on a design review or building permit if no design review is required or enforceable developers agreement. Applications for development permits shall be chronologically logged upon approval to determine rights to available capacity. A capacity reservation shall be valid for a time to be specified in the land development code; if construction is not initiated during this period, the reservation shall be terminated.

4. *Administration*

The City manager (or designee thereof) shall be responsible for concurrency management. The land development code shall specify administrative procedures, including an appeals mechanism, exemptions, plan modifications, burden of proof, etc.

5. *Project Impact or Demand Measurement*

The concurrency management user's procedural guide (a supplement to the land development code) will contain the formulas for calculating compliance plus tables which provide generation rates for water use, sewer use and solid waste, by land use category. Alternative methods acceptable to the City manager or designee thereof may also be used by the applicant.

6. *Additional Criteria*

A development order may be issued subject to the conditions that the necessary facilities and services needed to serve the new development are scheduled to be in place or under actual construction not more than three years after issuance of a certificate of occupancy or its functional equivalent as provided in the adopted plan's five-year schedule of capital improvements. The schedule of capital improvements may recognize and include transportation projects included in the first three years of the FDOT five-year work program.

**Policy 1.1.5**

The City shall enact and enforce land development code standards and incentives to achieve new development, renovated development and/or redevelopment that meets high standards for drainage and stormwater management, open space and landscaping, and on-site circulation and parking and other development standards in keeping with the goals, objectives and policies of this plan.

**Policy 1.1.6**

The City will continue to permit mixed-use development and promote affordable housing opportunities to residents of various income levels.

**Policy 1.1.7**

Miami Springs will cooperate with the Miami-Dade County Water and Sewer Department and other Miami-Dade County departments to help ensure that wellfields and cones of influence are protected. Protection measures shall include restrictions on uses. No new facilities that use, handle, generate,

transport or dispose of hazardous wastes shall be permitted within wellfield protection areas, and all existing facilities that use, handle, generate, transport or dispose of more than the maximum allowable quantity of hazardous wastes (as specified in Chapter 24-12.1 of the Code of Miami-Dade County, as may be amended from time to time within wellfield protection areas shall be required to take substantial measures such as secondary containment and improved operating procedures to ensure environmentally safe operations.

### **Policy 1.1.8**

The Future Land Use Category Descriptions:

***Single Family Residential Category:*** This category of land use allows single family detached homes on lots of at least 7,500 square feet of net area. Other uses allowed on land within this category include public parks, primary and secondary schools, houses of worship and public utility facilities necessary to serve the homes within this category. The 7,500 square foot lot size limitation shall not preclude the continued use, development or redevelopment of a home on a smaller lot where such lot or parcel was platted or otherwise of record prior to the adoption of this Plan. This land use category may be effectuated by one or more zoning districts, provided that all are consistent with the use provisions and none exceed the density restrictions stated herein. In addition to the 7,500 square foot minimum lot size, development shall not exceed 5 dwelling units per acre, including rights-of-way.

***Multifamily Residential Category:*** This category of land use allows multifamily and single family attached residential development up to 20 dwelling units per acre. Neither public nor private rights-of-way shall be counted for the purpose of determining the permitted number of units. Accessory recreation facilities such as swimming pools and tennis courts may be permitted in residential developments provided they are for the exclusive use of the residents of the development in which they are located. Other uses allowed on land within this category include public parks, primary and secondary schools, houses of worship, and public utility facilities necessary to serve the uses within this category. "Community residential homes" shall be allowed as special exceptions subject to such standards as are consistent with applicable state law in general and Chapter 419, F.S. in particular. Single family detached residential units may be allowed at a density of one dwelling unit per 7,500 square feet of site area allocated to single family use. This land use category may be effectuated by one or more zoning districts, provided that all are consistent with the use provisions and none exceed the density restrictions stated herein. [Scrivener's note: The cited statute requires local units of government to allow "community residential homes" with six or fewer residents in single family residential areas provided that they are at least 1,000 feet apart. It requires local units of government to allow "community residential homes" with up to 14 residents in multi-family areas provided that

they are at least 1,200 feet apart and provided certain additional conditions are met. One of these additional conditions is discretionary, namely that the character of the area not be changed.]

***Central Business District Category:*** This category of land use is intended to foster a suburban downtown which will: 1) satisfy the frequent retail, personal and professional service needs and desires of persons residing and/or working in Miami Springs and surrounding areas making up its market area; and 2) provide a specialty shopping/restaurant/entertainment destination for a large market area. This category may allow a wide range of convenience and comparison shopping facilities, restaurants, theaters and other compatible uses. Other uses permitted on land within this category could include business and professional office uses; residential uses on upper floors above retail, office and related uses; public parks; municipal buildings and facilities; and public utilities necessary to serve the uses within this category. Buildings within this category shall be limited to a floor area ratio of 1.0.

***Neighborhood Business District Category:*** This category of land use is intended to foster commercial uses that accommodate the frequent retail and personal needs and desires of persons residing and/or working immediately adjacent residential neighborhoods. It is intended to make conveniently available to residents those goods and services which need to be purchased very frequently during the week. Zoning regulations which effectuate this category could allow a wide range of convenience facilities and other compatible uses. Other uses permitted on land within this category could include business and professional office uses; residential uses on upper floors above retail, office and related uses; public parks, municipal buildings and facilities and public utilities necessary to serve the uses within this category. Buildings within this category shall be limited to a floor area ratio of 1.0.

**In 2007, the City of Miami Springs abolished the Airport, Marine and Highway Business District to create three separate Districts in its place. Descriptions of the new districts are listed below:**

***Airport Golf District:*** The area comprising this district is bounded by Curtiss Parkway, Fairway Drive and Deer Run. This district is intended to encourage a wide range of compatible and complimentary uses, such as, to-wit:

- 1) Office and commercial business,
- 2) Restaurants,
- 3) Hotels,
- 4) Retail service operations,
- 5) Residential development in accordance with the City Charter,
- 6) Mixed-use projects,
- 7) Other enterprises not inconsistent with the intent of the district that may be provided in the effectuating District Boundary Regulations.

Development within this district shall be permitted a floor area ratio (FAR) of 1.0 by right.

***NW 36th Street District:*** The area comprising this district extends from Curtiss Parkway on the west to the point where the Miami Canal intersects with NW 36th Street on the east. This district is intended to encourage large-scale developments of a wide range of compatible and complimentary uses, such as, to-wit:

- 1) Office and commercial business,
- 2) Restaurants,
- 3) Hotels,
- 4) Residential development in accordance with the City Charter,
- 5) Mixed-use projects,
- 6) Retail service operations,
- 7) Other enterprises not inconsistent with the intent of the district that may be provided in the effectuating District Boundary Regulations.

Development within this district shall be permitted to utilize a floating Floor Area Ratio (FAR) of between 1.0 and 3.0. However, the determination of the approved and authorized FAR for any proposed project shall remain with the City Council and be directly dependent upon the meeting of certain criteria or incentive provisions to be set forth in the District Boundary Regulations approved and established for this district.

***Abraham Tract District:*** The area comprising this district is located south of NW 36th Street and was previously annexed by the City of Miami Springs with the approval of the property owner. This district is intended to encourage large-scale development of a wide range of compatible and complimentary uses, along with appropriately approved industrial and adult uses, such as, to-wit:

- 1) Office and commercial businesses,
- 2) Restaurants,
- 3) Hotels,
- 4) Retail service operations,
- 5) Residential development in accordance with the City Charter,
- 6) Mixed-use projects,
- 7) Adult-related business activity or use,
- 8) Industrial enterprises which are in conformity with the restrictions and limitations for such businesses to be provided in the District Boundary Regulations,
- 9) Other enterprises not inconsistent with the intent of this district that may be provided in the effectuating District Boundary Regulations.

Developments within this district shall be permitted to utilize a floating Floor Area Ratio (FAR.) of between 1.0 and 3.0. However, the determination of the approved and authorized FAR for any proposed project shall remain with the City Council and be directly dependent upon the meeting of certain criteria or incentive provisions to be set forth in the District Boundary Regulations approved and established for this district.

***Public Recreational Open Space Category:*** This category of land use allows public noncommercial recreational uses such as passive and active parks, playgrounds, golf courses and ancillary and secondary uses supportive of such activities. Buildings within this category shall be limited to 20 feet in height and 10 percent lot coverage.

***Public Building Category:*** This category of land use allows government buildings including administrative buildings and health care facilities where compatible with the surrounding area. Public parks and public utilities necessary to serve the uses within this category are also permitted. Buildings within this category shall be limited to a floor area ratio of 1.0.

***Public and Private Education Category:*** This category of land use allows public and private educational uses, including elementary schools, middle schools and high schools. Passive and active parks, playgrounds and ancillary and secondary uses supportive of educational uses should be permitted. Buildings within this category shall be limited to a floor area ratio of 0.5.

***Religious Institutional Category:*** This category of land use allows facilities for religious and similar institutions, including, but not limited to, houses of worship and related schools. Public parks and public utilities necessary to serve the uses within this category are also permitted. Buildings within this category shall be limited to a floor area ratio of 0.5.

***Medical/Residential Category:*** This category of land use allows nursing homes and similar facilities for long term medical care in a residential environment. Buildings within this category shall be limited to a floor area ratio of 0.5. Residential dwelling units shall be limited to a density of 20 dwelling units per acre.

***Public Well Field Site Category:*** This category of land use allows public well fields and open space and recreation uses.

***Water Body and Water Way Category:*** This category of land use allows water ways and water bodies and no other development.

### **Policy 1.1.9**

The City shall maximize the use of native plants in City landscaping projects and large

redevelopment sites utilizing Florida Friendly Landscape principles to provide and improve urban habitat and connectivity for native species.

**Policy 1.1.10**

The City shall adopt Florida Friendly Landscape principles into the Land Development Regulations.

**Objective 1.2      Redevelopment and Renewal**

*Encourage the redevelopment and renewal of blighted areas which may be suitable for affordable, workforce residential and mixed-use projects.*

**Policy 1.2.1**

The City will adopt and maintain a community redevelopment plan that will address commercial redevelopment and deteriorated and blighted areas within the community.

**Policy 1.2.2**

From the community and/or redevelopment plan prepared under Policy 1.2.1, formulate an overall implementation strategy consisting of a mix of programs and funding sources best suited to the development and redevelopment needs of Miami Springs.

**Policy 1.2.3**

Implement community development and physical redevelopment plans for the Downtown and the NW 36th Street Commercial Corridor. These plans will include land use and mixed-use design concepts, infrastructure and transportation, with implementation mechanisms.

**Policy 1.2.4**

Restrict new retail facilities in the downtown redevelopment area to allowable uses and a size which is compatible and consistent with the character of the area and the nearby residential uses.

**Policy 1.2.5**

The City shall vigorously enforce codes which require the maintenance of residential and non-residential structures. Particular emphasis shall be placed on pursuing this policy in a way which protects and preserves historic structures and prevents single-family homes from falling into disrepair.

**Policy 1.2.6**

Should the properties in the block between Curtiss Parkway and Eldron Drive be consolidated, either by a Community Redevelopment Agency or by a private developer, the City shall consider abandoning Eldron Drive. Actual abandonment shall not occur until a site plan for the block or major portion thereof shall be approved. The site plan shall include provisions for vehicular circulation external to the block itself.

**Objective 1.3 Elimination or Reduction Uses which are Inconsistent with Community Character**

*In general, encourage the elimination or reduction of uses which are inconsistent with the community's character and future land uses. This objective shall be measured by implementation of its supporting policies.*

**Policy 1.3.1:**

Inconsistent uses as referred to in Objective 1.3 above are hereby defined as any uses which are located on a site where they would not be permitted by this comprehensive plan.

**Policy 1.3.2:**

The City shall continue to enforce land development regulations which protect the rights of property owners to continue non-conforming uses, but which, at a minimum, provide for the termination of such rights upon the abandonment of a non-conforming use for an extended period of time.

**Objective 1.4 Ensure Protection of Natural Resources**

*In general, ensure protection of natural resources. In particular, upgrade the drainage system so that stormwater outfalls into the Miami River Canal fully meet National Pollution Discharge Elimination System (NPDES) standards.*

**Policy 1.4.1**

The City shall enact and enforce land development code provisions that require one inch of on-site drainage detention, post development runoff equal to or less than pre development runoff, erosion control, a minimum percentage of pervious open space, maintenance of swales, drainage level-of-service standards, and other environmentally sensitive land protection measures. Such provisions shall be consistent with this plan and with the applicable Florida statutory and administrative code requirements. They shall also be consistent with applicable standards promulgated by the South Florida Water Management District; the South Florida Regional Planning Council; the Miami-Dade County Department of Permitting, Environment and Regulatory Affairs; the Florida Department of Environmental Protection; and/or other agencies with relevant jurisdiction and/or information.

### **Policy 1.4.2**

The City shall continue to follow all or a portion of the recommendations of the May 1995 Storm water Management Masterplan prepared by Post, Buckley Schuh & Jernigan, Inc. The policy implications of the Post, Buckley, Schuh & Jernigan, Inc. study are incorporated herein by reference.

### **Policy 1.4.3**

The City shall continue to incorporate in its capital improvements program any and all expenditures necessitated by the implementation of Policy 1.4.2 above.

### **Policy 1.4.4**

The City will periodically test pollutant loads in its six stormwater outfalls.

### **Policy 1.4.5**

The City shall update its Drainage Comprehensive Plan as necessary to ensure the continued efficacy of its provisions to upgrade the storm sewer system.

### **Policy 1.4.6**

The City will continue to ensure coordination between land use and future water supply planning.

## **Objective 1.5 Protection of Historic Resources**

*Ensure the protection of the City's most valuable historic resources. This objective shall be measured by implementation of its supporting policies.*

### **Policy 1.5.1**

Retain, revise as may be appropriate, and enforce the City's historic preservation ordinance.

### **Policy 1.5.2**

Vigorously enforce existing building maintenance codes in order that historic structures do not fall into such severe states of disrepair that they cannot feasibly be brought up to standard condition.

### **Policy 1.5.3**

The City's most valuable historic resources are hereby defined to include: 1) The Pueblo Hotel portion of the Fair Havens Nursing Home, which is a state-designated historic site; and 2) The Curtiss mansion at the Villas. Additional

potential historic sites include, but are not limited to those listed in Table 1.1 of the Future Land Use Element.

**Objective 1.6 Hurricane Evacuation**

*Coordinate future land uses by encouraging the elimination or reduction of land uses which are inconsistent with applicable interagency hazard mitigation report recommendations and enhance the efforts of the Miami- Dade Office of Emergency Management by providing it with all relevant information. This objective shall be measured by implementation of its supporting policies.*

**Policy 1.6.1**

The City shall regulate all future development within its jurisdiction in accordance with the Future Land Use Map. It shall also consider the most current Interagency Hazard Mitigation Team Report as part of the development regulations. The City shall periodically review and revise the Future Land Use Map in light of future interagency hazard mitigation reports in order to reduce or eliminate uses which are inconsistent therewith.

**Policy 1.6.2**

The City Manager or designee shall annually assess the City's existing and permitted population densities to determine if changes are significant enough to transmit such data to the Miami-Dade Office of Emergency Management to assist in their hurricane evacuation planning.

**Objective 1.7 Discourage the Proliferation of Urban Sprawl**

*Discourage the proliferation of urban sprawl. This objective shall be measured by implementation of its supporting policy.*

**Policy 1.7.1**

It is a legislative determination of the City that development according to the Future Land Use Map will discourage urban sprawl by continuing to provide residential and employment opportunities in Miami Springs, which is inside the Miami-Dade County Urban Development Boundary.

**Objective 1.8 Drainage and Sewer System Land Needs**

*In general, ensure the availability of suitable land for drainage and sanitary sewer system facilities needed to support planned infrastructure improvements. In particular, retain all land owned by the City suitable and necessary for infrastructure*

### **Policy 1.8.1**

The City shall not vacate any road rights-of-way without first determining that the vacated right-of-way is not necessary to accommodate future storm and/or sanitary sewer facilities, all of which are expected to be needed in the future can be accommodated in such rights-of-way.

## **Objective 1.9 Innovative Development Regulations**

*Encourage the use of innovative land development regulations which may include provisions for planned unit developments and other mixed use development techniques. This objective shall be measured by implementation of its supporting policy.*

### **Policy 1.9.1**

The City will pursue the below techniques as a means for accomplishing the objectives to provide adequate sites for low, very low, and moderate income housing, including but not limited to:

- a) Mixed-use development
- b) Environmentally conscious or “green” housing design
- c) The use of traffic circulators throughout the City routed near affordable housing developments

**Objective 1.10** *Decisions regarding the location, extent and intensity of future land use will be based upon the physical feasibility of providing all urbanized areas with services at levels of service (LOS) which meet or exceed the minimum standards adopted in the Capital Improvements Element.*

### **Policy 1.10.1**

All development orders authorizing new, or significant expansion of existing, urban land uses shall be contingent upon the provision of services at the levels of service (LOS) which meet or exceed the LOS standards specified in the Capital Improvements Element (CIE).

### **Policy 1.10.2**

Miami Springs shall consider maintaining and enhancing formalized requirements and procedures for all development, regardless of size, to contribute its proportionate share of capital facilities, or funds or land therefore, necessary to accommodate impact of the proposed development or increment of redevelopment over and above preexisting development on a site.

### **Policy 1.10.3**

Miami Springs shall continue and, where possible, improve efforts to coordinate projects to construct or repair infrastructure such as roadways and utilities in order to minimize the disruption and inconvenience caused by such construction activities.

**Objective 1.11** *The location, design and management practices of development and redevelopment shall ensure the protection of natural resources and systems by recognizing, and sensitively responding to constraints posed by soil conditions, topography, water table level, vegetation type, wildlife habitat, and hurricane and other flood hazards, and by reflecting the management policies contained in resource planning and management plans prepared pursuant to Chapter 380, Florida Statutes, and approved by the Governor and Cabinet.*

### **Policy 1.11.1**

Development orders shall be consistent with the goals, objectives and policies contained in the Conservation Element of this Plan, and with all applicable environmental regulations, as well as all other elements of the Comprehensive Plan.

### **Policy 1.11.2**

Significant natural resources and systems which shall be protected from incompatible land use include the Miami River, the Ludlam Canal, and potable water-supply wellfield areas identified in the Future Land Use Element.

**Objective 1.12** *Assure compatibility of adjacent land uses and developments through plan adoption and implementation procedures.*

### **Policy 1.12.1**

Continue to revise the Land Development Code for compliance and consistency with the Comprehensive Plan.

### **Policy 1.12.2**

Provide proper buffering between uses and differing types of development through the adoption of urban design guidelines (as defined by district boundary regulations), governing land use transitions, as well as traditional screening and setback requirements.

**Objective 1.13** *Provide continuity between the old and the new in the built environment. Retain the scale and the unique character of the Commercial Districts.*

**Policy 1.13.1**

Retain the older, historically valuable buildings in and around the Commercial Districts. Encourage adaptive re-use of older buildings by promoting rehabilitation and reuse of existing structures that contribute to the overall design character of Commercial Districts.

**Policy 1.13.2**

Maintain the existing scale of Commercial Districts. New construction should fit into the context of the existing built environment and complement Commercial Districts' character. Encourage infill development that is compatible with existing uses and improves the pedestrian environment and the streetscape. Permit taller buildings only if they are in scale with other structures in the area.

**Objective 1.14** *Improve the visual quality of the Commercial Districts, with an emphasis on the pedestrian environment.*

**Policy 1.14.1**

Support entrance and facade remodeling on the Commercial District's buildings that will contribute to the pedestrian environment and the character of the Commercial Districts.

**Policy 1.14.2**

Develop city programs to improve the pedestrian and aesthetic nature of the Commercial Districts environment.

**Policy 1.14.3**

Encourage cooperation between the business community and the City in the establishment of attractive and successful Commercial Districts. Require individuals (merchants, owners and business people) to contribute and maintain landscaping throughout Commercial Districts on their own property and in the public domain.

**Policy 1.14.4**

Recognize that different parts of the Commercial Districts have special character, and develop programs to strengthen and reinforce them. Develop land use, density, special design features, and building guidelines.

**Objective 1.15** *Ensure that the Commercial Districts enhance Miami Springs unique social and cultural character by making the Commercial Districts a center with both daytime and nighttime activities.*

**Policy 1.15.1**

Provide cultural activities and opportunities for diverse ethnic, age, and social groups in the Commercial Districts.

**Objective 1.16** *The City will adopt Land Development Code/Regulations that enhance the redevelopment potential of the NW 36<sup>th</sup> Street District and the Abraham Tract District.*

**Policy 1.16.1**

The City will create a new section within the LDRs to provide specific redevelopment incentives and parameters for the NW 36<sup>th</sup> Street District including, but not limited to:

- Permitted and prohibited uses
- Setbacks, lot coverage and floor area ratios
- Architectural design standards
- Standards for off-street parking
- Development review procedures

**Policy 1.16.2**

The City will create a new section within the LDRs to provide specific redevelopment incentives and parameters for the Abraham Tract District including, but not limited to:

- Permitted and prohibited uses
- Setbacks, lot coverage and floor area ratios
- Architectural design standards
- Standards for off-street parking
- Development review procedures

Poinciana Boulevard	Circular Park	

## TRANSPORTATION ELEMENT

**Goal 1: PROVIDE FOR A MULTI-MODAL TRANSPORTATION SYSTEM THAT MEETS THE NEEDS OF MIAMI SPRINGS AND THE LARGER COMMUNITY OF WHICH MIAMI SPRINGS IS A PART WITH MINIMAL NEGATIVE IMPACT ON THE QUALITY OF LIFE.**

### **Objective 1.1 Motorized and Non-Motorized Transportation System**

*In general, provide for a safe, convenient, and efficient motorized and non-motorized transportation system. In particular, achieve acceptable level of services on public roads. This objective shall be made measurable by its implementing policies.*

#### **Policy 1.1.1**

The City shall regulate the timing of development to maintain at least the following peak period hour Level of Service standards on roadways that lie within its municipal boundaries:

- The level of service standard adopted by the Miami-Dade County Comprehensive Development Master Plan for all state and county roadways within Miami Springs. The Miami-Dade County standards are as follows:
  - Where extraordinary transit service such as commuter rail or express bus service exists, parallel roadways within 1/2 mile shall operate at no greater than LOS E +20% of their capacity. This standard shall apply to N.W. 36th Street.
  - Where mass transit service having headways of 20 minutes or less is provided within 1/2 mile distance, roadways shall operate at no greater than LOS E +20% of their capacity. This standard shall apply to Okeechobee Road and Royal Poinciana Boulevard.
  - Where no public mass transit service exists, roadways shall operate at or above LOS E.
  - In Urban Infill Areas, 20 percent of non-State roads may operate below E.
  
- Level of service "D" for all local roads within Miami Springs.

For the purpose of this policy, the "peak period hour" or PPH shall be the average of the two highest consecutive hours. Special Transportation Areas are established through a legal process.

### **Policy 1.1.2**

The City shall enact and enforce land development code standards and a review process to control roadway access points, on-site traffic flow and on-site parking. The land development code will require the use of joint access drives for compatible non-residential adjacent uses. It will also set minimum design standards for:

- the spacing and design of driveway curb cuts;
- the size of ingress and egress lanes for major land uses;
- the spacing and design of median openings; and
- the provision of service roads.

The State and County have access management standards that shall be considered in developing roadway access point controls, although they are mandatory only for state or county highways. The access management controls will be tailored to achieve the ends set forth in Objective 1.1. On-site traffic flow and on-site parking standards will be designed to encourage high levels of pedestrian and bicycle use, including requiring bike racks under certain conditions.

### **Policy 1.1.3**

The City shall approve no alteration in the existing traffic circulation system which materially reduces the continuity and rights-of-way of arterials or collectors shown on the Future Transportation Map. The Future Transportation Map will provide, at minimum, for the 5 and 10 year planning horizon. This policy shall not be interpreted to block closing of local streets to enhance neighborhood security and quietude. The planning horizon for the City's transportation system shall be 2040, and shall be reviewed for updates upon the Miami-Dade Transportation Planning Organization's adoption of an updated regional Long-Range Transportation Plan.

### **Policy 1.1.4**

The City shall develop bicycle path facilities and landscaping on the Miami River Canal and the Ludlam Canal.

### **Policy 1.1.5**

The City shall enact and/or maintain on-site circulation and parking requirements designed to ensure large circulation aisles, turning radii and parking spaces. Pedestrian access ways should be required through large parking lots to connect building areas to public sidewalks. Bicycle parking racks should be required for large scale uses. Parking regulations should establish the minimum number of parking spaces which will be required to serve uses; minimums should be based on intensity measures such as building

square feet. Parking regulations should establish appropriate minimum sizes for circulation aisles, parking stalls and parking stall angles. General standards should provide for review of parking lot layout in order to ensure that the layout will be safe. The City shall evaluate the feasibility and desirability of establishing special parking requirements for the Central Business District.

**Policy 1.1.6**

The current architectural integrity, dimensions and location of the bridges which cross the Miami River Canal shall be maintained. The City shall employ all feasible efforts to ensure that the appearance and location of the historic bridges is not altered in any way. This policy shall not be interpreted as preventing maintenance that preserves structural integrity so long as the dimensions, profile and surface color and texture remains indistinguishable from the original design.

**Objective 1.2      Coordinate Traffic Circulation with Land Use**

*In general, coordinate the traffic circulation system with land uses shown on the future land use map. In particular, provide the traffic circulation system which is shown on the Future Transportation Map. This objective shall be made measurable by its implementing policies.*

**Policy 1.2.1**

Speeding and through-traffic on residential streets shall be identified and mitigated wherever necessary so as to make streets and sidewalks as pedestrian friendly as feasible. Various options for speed and traffic controls should be explored. Such options may take the form of stricter enforcement of speed limits, the placement of stop signs and utilizing other traffic calming techniques. Appropriate analysis and planning should be undertaken prior to final construction in the case of approaches which require physical solutions.

**Policy 1.2.2**

The City shall seek the installation of an appropriate quadrant gate at the point where Royal Poinciana crosses the Florida East Coast Railroad. It is one of the intents of this policy to reduce the need for trains to blow their whistles. Implementation of this policy is dependent on the enactment of Federal legislation permitting such gates.

**Objective 1.3      Coordination with FDOT and the MPO**

*In general, continue to coordinate plans and programs of the Florida Department of Transportation (FDOT), FDOT's Florida Transportation Plan and Metropolitan Planning Organization and monitor the impact of said plans/programs. In particular, coordinate with the MPO plans to improve*

*major arterials.*

**Policy 1.3.1**

The City shall continue to direct appropriate City staff to attend selected meetings of Metropolitan Planning Organization and related *ad hoc* committees pertaining to transportation infrastructure and operational projects which may affect Miami Springs.

**Policy 1.3.2**

The City shall direct appropriate staff to annually review and evaluate the Florida Department of Transportation 5-Year Transportation Plan and any plans created by Miami-Dade Expressway Authority and Miami-Dade County transportation agencies to determine if plans and programs contained therein necessitate any revision to this or other elements of this Comprehensive Plan.

**Policy 1.3.3**

In coordinating with the Metropolitan Planning Organization, the City shall promote and encourage only changes to the traffic and transit systems which: 1) do not disrupt those land use patterns in the City which are established and which are beneficial to residents; 2) do not disrupt those aspects of the local circulation system which are established and which are beneficial to the residents and businesses; and 3) do not increase the level of noise pollution to which City residents and businesses are subjected. In implementing this policy, the City shall resist to the maximum extent feasible any future efforts to create an elevated roadway as a means of enhancing the traffic capacity of NW 36th Street, but shall instead encourage to the maximum extent feasible efforts to improve NW 36 Street with "Smart Street" technologies. The City shall resist to the maximum extent feasible any regional thoroughfare improvements which would have the effect of bisecting the portion of the City south of NW 36th Street, the portion of the City commonly known as the "annexation area." Other implementation efforts will be undertaken as appropriate.

**Objective 1.4      Coordination with Transit Agency**

*In general, coordinate with the plans and programs of the Miami-Dade County Transit. This objective shall be made measurable by its implementing policies.*

**Policy 1.4.1**

The City shall direct appropriate city staff to attend selected meetings of the Miami-Dade County Transit pertaining to buses and other transit.

**Policy 1.4.2**

The City will study the densities and intensities on the Future Land Use Map in order to determine what increases are needed to coordinate with the ambitions of the Miami-Dade Transit to support existing and soon to be proposed transit services.

**Objective 1.5 Right-of-Way Protection**

*In general, protect existing rights-of-way and future rights-of-way from building encroachment. In particular, achieve zero net loss of right-of-way from building encroachment throughout the period during which this plan is in effect.*

**Policy 1.5.1**

The City shall use the land development code as enacted, the land development code enforcement procedures and the building code enforcement procedures to protect existing rights-of-way through setback requirements which prohibit right-of-way encroachments of any kind.

**Objective 1.6 Reduce Cut-Through Traffic**

*Reduce the intrusion of cut-through traffic and speeding, and improve the safety and mobility of pedestrians and bicyclists.*

**Policy 1.6.1**

The City shall continue to support the programs of its Bicycle-Pedestrian-Traffic Committee.

**Objective 1.7 Provision of Transit and Coordination of Transit Planning**

*In general, provide efficient mass transit and paratransit services based on existing and proposed major trip generators. In particular, provide the Miami-Dade County transportation planning agencies with ad hoc periodic development reports and other input on the status of any development or redevelopment which could alter the need for bus and paratransit services. This objective shall be made measurable by its implementing policies.*

### **Policy 1.7.1**

The City should prepare a written report to be transmitted to the Technical Coordinating Committee of the Metropolitan Planning Organization outlining the locations, characteristics and/or special transit needs that have developed or been identified in the year preceding the annual request for the Transportation Improvement Program Update. This report shall include: 1) estimated new employment by income; 2) estimated new patrons; 3) estimated new residential occupancy. Potential current and future mass transit needs will be suggested.

### **Policy 1.7.2**

The City should support proposals for increased frequency of bus service along NW 36th Street, Okeechobee Road and Le Jeune Road as a means to relieve tendencies for over capacity during peak hours.

## **Objective 1.8      Coordination with Plans for "Transportation Disadvantaged People"**

*On a continual basis and throughout the effective period of this plan, the City shall coordinate with the Miami-Dade Transit, the Metropolitan Planning Organization, the Florida Department of Transportation and any public transportation agency offering special services for "transportation disadvantaged people." This objective shall be made measurable by its implementing policies.*

### **Policy 1.8.1**

The City shall direct appropriate staff to attend selected meetings of the Miami-Dade Transit, the Metropolitan Planning Organization, the Florida Department of Transportation and any other public transportation agency offering special services for the disadvantaged.

### **Policy 1.8.2**

The City shall encourage the increased use of wheelchair accessible buses on Miami-Dade County bus routes which serve the City.

## **Objective 1.9      Transit Right-of-Way Protection**

*In general, protect existing and future mass transit rights-of-way and exclusive mass transit corridors. In particular, achieve zero net loss of right-of-way from building encroachment throughout the period during which this plan is in effect. This objective shall be made measurable by its implementing policy.*

### **Policy 1.9.1**

The City shall use the land development code as enacted, the land development code enforcement procedures and the building code enforcement procedures to protect existing rights-of-way through setback requirements which prohibit right-of-way encroachments of any kind.

### **Objective 1.10 Coordinate Airport Facilities with Land Use and Conservation**

*In general, coordinate the expansion of Miami International Airport with future Miami Springs land uses and the Conservation Element of this Comprehensive Plan. In particular, 1) provide Miami International Airport planners with ad hoc periodic input on the potential impact on Miami Springs of proposals for Miami International Airport and vice versa particularly with respect to roadway improvements. This objective shall be made measurable by its implementing policies.*

### **Policy 1.10.1**

The City shall direct appropriate staff to review plans and attend selected meetings pertaining to planning for Miami International Airport expansion. The City staff shall encourage airport planners to develop the north edge of the airport (which lies adjacent to Miami Springs) with a mix of land uses and buffers which will be compatible with adjacent land uses in the City. The City shall continue its active participation in the Miami International Airport Ad Hoc Committee established jointly by the City and the Village of Virginia Gardens. Further, the City shall continue its active participation in the planning efforts for Miami International Airport and the Airport Area through appropriate forums that may come into existence in the future, including those established and/or sponsored by Miami-Dade County, the State of Florida and the Federal Aviation Administration. The City shall encourage full implementation of the Miami International Airport Ad Hoc Committee's Phase I program, including especially the implementation of a FAR Part 150 Noise Compatibility Program for Miami International Airport.

### **Policy 1.10.2**

The Future Land Use Map shall be considered in all transportation planning.

### **Objective 1.11 Coordinate Surface Traffic Access to Miami International Airport with Traffic Portion of the Future Transportation Map**

*In general, coordinate surface transportation access to the Miami International Airport with traffic circulation system. In particular, coordinate with the Florida Department of Transportation (F-DOT) and the Metropolitan Planning Organization (MPO) to assure the development of a surface access system for Miami International Airport (MIA) and the Miami Intermodal*

*Center (MIC) which will be consistent with the goals, objectives and policies of the City of Miami Springs as articulated herein.*

**Policy 1.11.1**

The City shall coordinate with the Florida Department of Transportation (F-DOT) and the Metropolitan Planning Organization (MPO) to assure the development of a surface access system for the Miami International Airport (MIA) and the Miami Intermodal Center (MIC) which will be consistent with the goals, objectives and policies of the City of Miami Springs as articulated herein.

**Objective 1.12 Integrate Access to Miami International Airport with Surface Transit**

*In general, ensure that access routes to the Miami International Airport and related facilities are integrated with other modes of surface transit.*

**Policy 1.12.1**

The City shall direct appropriate staff to review plans and attend selected meetings pertaining to planning for Miami International Airport expansion. The City staff shall encourage airport planners to develop the north edge of the airport (which lies adjacent to Miami Springs) with a mix of land uses and buffers which will be compatible with adjacent land uses in the City.

**Objective 1.13 Provide Comprehensive Transportation Strategies**

*Identify effective strategies involving parking, traffic efficiency and alternative traffic routes.*

**Policy 1.13.1**

The City shall identify and evaluate parking strategies that are compatible with all other elements of this plan and promote transportation goals and objectives.

**Policy 1.13.2**

The City shall identify and evaluate transportation system management strategies that are compatible with all other elements of this plan and improve transportation system efficiency and safety.

**Policy 1.13.3**

The City shall identify and evaluate ways in which it can encourage local traffic to use alternatives to the Florida Interstate Highway-System route.

**Table 2.1**  
**Peak Hour Levels of Service, 2017 and 2022**  
**Public Roads within the City of Miami Springs**

ROADWAYS	LOS STANDARD	LOS, 2017	LOS, 2022
All local roads	D	D or better <sup>(1)</sup>	D or better <sup>(1)</sup>
Curtiss Parkway	E	D <sup>(2)</sup>	E or better <sup>(3)</sup>
East Drive	E	C <sup>(2)</sup>	E or better <sup>(3)</sup>

(1) According to the *Arterial Grid Analysis Study*, prepared by Kimley-Horn & Associates for the Miami-Dade Metropolitan Planning Organization (MPO) in 2007, all of the local roadways in Miami Springs are operating at an acceptable standard of D or better. At that time the population of the City is estimated to have been about 13,780.

Based on the City's most recent population projections for its five- and ten-year planning periods (13,934 in 2017 and 14,009 in 2022, respectively) population growth since 2007 will have amounted to only 1.1% by 2017 and just 1.7% by the year 2022. It is entirely unlikely that such limited population growth will result in increases in traffic along any of the City's local roadways sufficient to exceed the City's adopted level of service D any time during the planning period.

(2) The MPO's 2015 LRTP projected the Future LOS for Curtiss Parkway as D and East Drive was expected to have a level of service C in 2015. Recognizing the very limited growth expected from 2015 to 2017, it is highly unlikely the level of service in 2017 would differ significantly from that expected for 2015.

(3) The MPO's 2035 LRTP projects these roadways to be at LOS F in the year 2035. However, given the limited growth projected in the City, it is not expected that the levels of service on these roadways within the City will degenerate to below LOS E before the year 2022, the City's long-range planning horizon.

## **HOUSING ELEMENT**

### **GOAL 1 ENSURE THE AVAILABILITY OF AFFORDABLE SOUND AND DIVERSIFIED HOUSING STOCK IN MIAMI SPRINGS.**

#### **Objective 1.1 Creation of Affordable Housing**

*Facilitate development or preservation of renter-occupied units and owner-occupied units affordable for households earning 120 percent or less of County median income.*

##### **Policy 1.1.1**

The City will encourage programs which incorporate job training, job creation or other economic solutions to address affordable housing.

##### **Policy 1.1.2**

The City shall periodically review: 1) its own development permitting procedures; 2) best current practice employed by other jurisdictions; and 3) best current practice reported in relevant professional literature. The purpose of the review shall be to determine if there are appropriate procedural and substantive changes which could facilitate more expeditious development application processing.

##### **Policy 1.1.3**

Manufactured housing shall not be prohibited in any area designated by this plan for residential use. Mobile homes shall not be permitted in the City unless they meet the same standards as manufactured homes.

##### **Policy 1.1.4**

Housing for very low income, low income and moderate income households shall not be prohibited in any area designated by this plan for residential use.

##### **Policy 1.1.5**

The City will ensure the development of affordable housing in mixed-use areas is consistent with sections of the Future Land Use Element, including Objective 1.1 to encourage the redevelopment and renewal of blighted areas, Policy 1.2.3 to seek redevelopment plans for the Downtown and the NW 36<sup>th</sup> Street Commercial Corridor and, Policy 1.9.1 to consider adequate sites are appropriate for mixed use redevelopment.

### **Policy 1.1.6**

The City will ensure the location of affordable housing units is consistent with neighborhood character, as required in the Future Land Use Element Objective 1.1 to maintain existing and achieve new development consistent with neighborhood character, Policy 1.2.2 to formulate an overall implementation strategy and Policy 1.9.1 to provide adequate sites.

## **Objective 1.2 Preservation of Affordable Housing**

*Preserve affordable housing for all current and future residents. Preserve all of the existing units in sound condition through aggressive code enforcement and housing rehabilitation assistance.*

### **Policy 1.2.1**

The City shall enact and enforce the County minimum housing standards code or an appropriate modification enacted by the City Council.

### **Policy 1.2.2**

The City shall from time to time informally evaluate alternate strategies to guide enforcement of the County minimum housing standards code so as to achieve maximum effectiveness. It is recognized by this policy that systematic and ad hoc inspections might be most appropriate at different times and in different sub areas of the City.

### **Policy 1.2.3**

Through land development code setback/bulk standards and through implementation of drainage improvements, the City shall help assure the continuation of stable residential neighborhoods.

## **Objective 1.3 Substandard Housing**

*Eliminate substandard housing and show a reduction in the inventory of substandard housing units in the City.*

### **Policy 1.3.1**

Eliminate substandard housing (including those units lacking complete plumbing or lacking complete kitchen facilities), structurally and aesthetically improve, conserve, rehabilitate, and demolish substandard housing when needed.

**Objective 1.4 Adequate Sites for Group Homes**

*Accommodate small group homes and foster care facilities in residential areas. Provide at least one group home in the City.*

**Policy 1.4.1**

The City shall enact and enforce land development code regulations which permit HRS-licensed group homes, including foster care facilities. Such regulations shall permit small scale group homes and foster care facilities in residential areas and areas with residential character and shall otherwise be designed to meet State law in general and Chapter 419, F.S., in particular. Prior to enactment of such regulations, the City shall interpret and enforce applicable existing regulations in a manner which is fully consistent with State law and administrative code requirements pertaining to group homes.

**Objective 1.5 Housing Coordination and Implementation**

*The Local Planning Agency (LPA) shall serve as the body to coordinate and achieve housing policy implementation in coordination with the South Florida Local Initiatives Support Corporation (LISC).*

**Policy 1.5.1**

The City shall maintain formal communications with appropriate private and non-profit housing agencies to assure that adequate information on City housing policies flows to housing providers. A list of agencies shall include representatives from the local Board of Realtors, Builders Associations, and the South Florida Local Initiatives Support Corporation (LISC).

**Policy 1.5.2**

The City shall fully cooperate with any developer using County Surtax funds, the County Housing Finance Agency or other subsidy mechanisms.

**Objective 1.6 Historically Significant Housing**

*Identify and preserve historically significant residential structures.*

**Policy 1.6.1**

Retain, revise as may be appropriate, and enforce the City’s historic preservation ordinance.

**Policy 1.6.2**

Vigorously enforce existing building maintenance codes in order that historic structures do not fall into such severe states of disrepair that they cannot feasibly be brought up to standard condition.

## INFRASTRUCTURE ELEMENT

**GOAL 1 PROVIDE AND MAINTAIN THE PUBLIC INFRASTRUCTURE IN A MANNER THAT WILL ENSURE WATER QUALITY, CONSERVE NATURAL RESOURCES AND PROTECT THE PUBLIC HEALTH, SAFETY, AND QUALITY OF LIFE FOR MIAMI SPRINGS RESIDENTS.**

**Objective 1.1 Correct Drainage Deficiencies Increase Drainage Capacity**

*Correct existing drainage facility deficiencies and increase drainage facility capacity. Upgrade the drainage system so that stormwater outfalls into the Miami River Canal fully meet National Pollution Discharge Elimination System (NPDES) standards. Upgrade on site drainage standards to ensure that private properties retain at least the first one inch of stormwater on site and permit no more runoff after development than before development.*

**Policy 1.1.1**

The City shall enact and enforce land development code provisions that require one inch of on-site drainage detention, post development runoff equal to or less than pre development runoff, erosion control, a minimum percentage of pervious open space, maintenance of swales, drainage level-of-service standards, and other environmentally sensitive land protection measures. These requirements shall be designed to help ensure full compliance with the specific standards set forth in Objective 1.1, above. Such provisions shall be consistent with this plan and with the applicable Florida statutory and administrative code requirements. They shall also be consistent with applicable standards promulgated by the South Florida Water Management District; the South Florida Regional Planning Council; the Miami-Dade County Department of Permitting, Environment and Regulatory Affairs; the Florida Department of Environmental Protection; and/or other agencies with relevant jurisdiction and/or information.

**Policy 1.1.2**

The City shall continue to follow the recommendations of the May 1995 *Stormwater Management Masterplan* prepared by Post, Buckley Schuh & Jernigan as further defined in the priorities identified in the April 2001 *Stormwater Master Plan Update*. The policy and planning implications of the Post, Buckley, Schuh & Jernigan, Inc. studies are incorporated herein by reference.

**Policy 1.1.3**

The City will determine the need for laboratory testing of pollutant loads in its six stormwater outfalls.

**Policy 1.1.4**

The City shall update its Stormwater Management Master Plan as necessary to ensure the continued efficacy of its provisions to upgrade the storm sewer system in accordance with the specific standards of Objective 1.1 above.

**Objective 1.2      Correct Solid Waste Deficiencies Increase Solid Waste Capacity**

*In general, correct existing solid waste system deficiencies and increase solid waste system capacity. In particular, achieve the most cost-effective solid waste collection system.*

**Policy 1.2.1**

The City will continue to make any recommended changes in the solid waste collection system, including the recycling component.

**Objective 1.3      Correct Potable Water Deficiencies**

*To correct existing potable water system deficiencies and otherwise improve potable water service.*

**Policy 1.3.1**

The City shall coordinate with Miami-Dade County Water and Sewer Department to identify and correct potable water deficiencies in the City.

**Policy 1.3.2**

The City shall coordinate with Miami-Dade County Water and Sewer Department to plan for infrastructure improvements and expansions to serve new development and redevelopment.

**Policy 1.3.3**

The City will support the SFWMD and Miami-Dade County water reuse projects and implementation of new regulations or programs designed to increase the volume of reclaimed water used and public acceptance of reclaimed water.

**Policy 1.3.4**

The City will coordinate with Miami-Dade County in the adoption and updates to the Water Supply Plan.

**Objective 1.4 Level of Service**

*Continue to secure adequate water supply and potable water treatment capacity to meet the City’s adopted level of service (LOS) standards; see policies for measurable standards.*

**Policy 1.4.1**

**Sanitary Sewers:** Regional wastewater treatment plants shall operate with a physical capacity of no less than the annual average daily sewage flow. Effluent discharged from wastewater treatment plants shall meet all federal, State and County standards. The system shall maintain the capacity to collect and dispose of 102 percent of average daily sewage demand for the preceding 5 years.

**Policy 1.4.2**

**Potable Water:** The City shall secure adequate potable water supply from the Miami-Dade Water and Sewer Department. In addition, the City shall enforce the following standards through its interlocal agreement with the Miami-Dade Water and Sewer Department:

- a) The regional treatment system shall operate with a rated maximum daily capacity of no less than 2 percent above the maximum daily flow for the preceding year, and an average daily capacity 2 percent above the average daily system demand for the preceding 5 years.
- b) Water shall be delivered to users at a pressure of no less than 20 pounds per square inch (psi) and no greater than 100 psi. Unless otherwise approved by the Miami-Dade Fire Department, minimum fire flows based on the land use served shall be maintained as follows:

Land Use	Min. Fire Flow (gpm)
Single Family Residential Estate	500
Single Family and Duplex; Residential on minimum lots of 7,500 sf	750
Multi-Family Residential; Semiprofessional Offices	1,500
Hospitals; Schools	2,000
Business and Industry	3,000

- (c) Water quality shall meet all federal, state, and county primary standards for potable water.
- (d) Countywide storage capacity for finished water shall equal no less than 15 percent of the countywide average daily demand.

### **Policy 1.4.3**

**Drainage:** All nonresidential development and redevelopment shall adequately accommodate runoff to meet all Federal, state and local requirements. Stormwater shall be treated in accordance with the state code. One inch of runoff shall be retained on site. Post-development runoff shall not exceed peak pre-development runoff.

### **Policy 1.4.4**

**Solid Waste:** The County solid waste disposal system shall maintain a minimum of five years capacity. For City planning purposes, a generation rate of 5.2 pounds per person per calendar day shall be used.

## **Objective 1.5 Water Conservation**

*Implement water conservation initiatives recommended by Miami-Dade County, the South Florida Water Management District, the Florida Department of Environmental Protection and the City's Utilities Department.*

### **Policy 1.5.1**

The City shall enact and enforce land development code and other regulations that include: 1) water conservation-based irrigation requirements; 2) water conservation-based plant species requirements derived from the South Florida Water Management District's list of native species and other appropriate sources; 3) lawn watering restrictions; 4) mandatory use of ultra-low volume water saving devices for substantial rehabilitation and new construction; and 5) other water conservation measures, as feasible. The City will comply with water use efficiency techniques for indoor water use in accordance with Section 8-31, 32-84 and 8A-381 of the Code of Miami-Dade County. All future development will comply with the landscape standards in Sections 18- A and 18-B of Miami-Dade County Code.

### **Policy 1.5.2**

The City shall promote education programs for residential, commercial and other uses which will discourage waste and conserve potable water. The City will coordinate with the Miami-Dade Water and Sewer Department on this matter whenever possible.

### **Policy 1.5.3**

The City shall collaborate with the Miami-Dade County Water and Sewer Department efforts to identify and reduce non-revenue water.

**Policy 1.5.4**

The City shall coordinate future water conservation efforts with the Miami-Dade Water and Sewer Department and the South Florida Water Management District to ensure that proper techniques are applied. In addition, the City shall continue to support and expand existing goals, objectives and policies in the comprehensive plan that promote water conservation in a cost-effective and environmentally sensitive manner.

**Policy 1.5.5**

The City will continue to actively support the SFWMD and Miami-Dade County in the implementation of new regulations or programs that are designed to conserve water during the dry season. The City will also comply with the water conservation requirements of the Miami-Dade County Code.

**Policy 1.5.6**

The City shall adopt Florida Friendly Landscape principles into the Land Development Regulations.

**Policy 1.5.7**

The City shall maximize the use of native plants in City landscaping projects and large redevelopment sites utilizing Florida Friendly Landscape principles to provide and improve urban habitat and connectivity for native species.

**Policy 1.5.8**

The City shall continue to evaluate alternative potable water supply sources evaluation techniques and technologies for water capture and reuse, including rainwater harvesting, and revise its Land Development Regulations as necessary to allow for these options with local building design.

**Policy 1.5.9**

The City shall continue to promote the use of ultra-low-flow high efficiency plumbing fixtures through its Showerhead Exchange Program and requires and enforces the guidelines established by the Florida Building Code, Plumbing.

## CONSERVATION ELEMENT

### GOAL 1 PRESERVE AND ENHANCE SIGNIFICANT NATURAL RESOURCES IN MIAMI SPRINGS.

#### Objective 1.1 Air Quality

*In general, protect air quality. In particular, achieve or maintain applicable standards as established by the U.S. Environmental Protection Agency.*

##### Policy 1.1.1

Facilitate more efficient transportation services and facilities (including public transit facilities, bicycle facilities and pedestrian facilities) by pursuing the objectives and policies set forth in the Transportation Element.

##### Policy 1.1.2

Emissions of fumes and vapors from all hazardous waste facilities shall be controlled, and these facilities shall comply with Lowest Achievable Emission Rates. Vapor control systems shall be required to reduce hydrocarbon emissions from vehicles being filled at gas stations.

##### Policy 1.1.3

Require oxygen renourishing landscaping as a part of new private development.

##### Policy 1.1.4

Provide oxygen renourishing landscape for public grounds.

##### Policy 1.1.5

The City shall encourage the State of Florida and Miami-Dade County departments to establish permanent air quality monitoring stations in Miami Springs and other areas impacted by Miami International Airport.

#### Objective 1.2 Water Supply Quantity and Quality

*In general, conserve, appropriately use and protect the quality and quantity of current and projected water sources. In particular, upgrade the drainage system so that stormwater outfalls into the Miami River Canal fully meet National Pollution Discharge Elimination System (NPDES) standards. Upgrade on site drainage standards to ensure that private properties retain at least the first one inch of stormwater on site and permit no more runoff after development than before development.*

### **Policy 1.2.1**

The City shall cooperate with the Miami-Dade County Water and Sewer Department and other Miami-Dade County departments to help ensure that wellfields and cones of influence are protected. Protection measures shall include restrictions on uses. No new facilities that use, handle, generate, transport or dispose of hazardous wastes shall be permitted within wellfield protection areas, and all existing facilities that use, handle, generate, transport or dispose of more than the maximum allowable quantity of hazardous wastes (as specified in Chapter 24-12.1 of the Code of Miami-Dade County, as may be amended) within wellfield protection areas shall be required to take substantial measures such as secondary containment and improved operating procedures to ensure environmentally safe operations.

### **Policy 1.2.2**

The City shall also prohibit the deposit of solid waste or industrial waste including spent oils, gasoline by-products or greases accumulated at garages, filling stations and similar establishments that create a health or environmental hazard upon any vacant, occupied or unoccupied premises, parkway or park, and in any canal or waterway within the City.

### **Policy 1.2.3**

The City shall ensure that the water quality in the traditional and new alternative water supply sources is protected.

## **Objective 1.3 Water Supply**

*To support the City's potable water suppliers in the development of alternate water supply sources as approved by the South Florida Water Management District and to further conserve potable water during emergency situations.*

### **Policy 1.3.1**

The City will continue to enforce emergency water conservation ordinance based on both the South Florida Water Management District model ordinance and any specific SFWMD requirements. In addition, the City will work with SFWMD to create a plan which allows for alternative water supply development funding, more comprehensive regional water supply plans, and enhanced consumptive use permitting.

### **Policy 1.3.2**

Miami Springs shall support agencies that supply potable water to the City (through intergovernmental coordination) in the development of alternate water supply sources as approved by the SFWMD.

### **Policy 1.3.3**

The City shall continue to evaluate alternative potable water supply sources evaluation techniques and technologies for water capture and reuse, including rainwater harvesting, and revise its Land Development Regulations as necessary to allow for these options with local building design

### **Policy 1.3.4**

The City shall continue to promote the use of ultra-low-flow high efficiency plumbing fixtures through its Showerhead Exchange Program and requires and enforces the guidelines established by the Florida Building Code, Plumbing.

## **Objective 1.4      Vegetative Communities, Soils Wildlife Habitat and Wildlife**

*In general, develop, conserve, appropriately use and protect native vegetative communities for their own sake and to protect soils, wildlife habitat and wildlife. In particular, achieve some enhancement and expansion of native vegetative communities, including fisheries and marine habitat.*

### **Policy 1.4.1**

The City shall retain an appropriate professional with expertise in native vegetation to monitor areas for which the City has maintenance responsibility and on which is located native vegetation. The expert will prepare appropriate reports and recommendations for enhancing native vegetation. This policy shall only be implemented if the City has adequate resources to meet this and all higher priority undertakings.

### **Policy 1.4.2**

The City shall evaluate the feasibility of incorporating recommendations derived from the implementation of Policy 1.4.1 above into the Capital Improvements Budget or the operating budget.

### **Policy 1.4.3**

The City shall prohibit the deposit of solid waste or industrial waste including spent oils, gasoline by-products or greases accumulated at garages, filling

stations and similar establishments that create a health or environmental hazard upon any vacant, occupied or unoccupied premises, parkway or park, and/or in any lake, canal or waterway within the City.

**Policy 1.4.4**

The City shall take feasible actions which may be identified from time to time as tending toward the protection of natural functions of soils, fisheries, wildlife habitats, rivers, bays, lakes, floodplains, harbors, wetlands and marine habitats. To the extent feasible, City staff shall monitor professional literature, attend conferences and consult with interested parties in order to identify potential actions.

**Policy 1.4.5**

The City shall continue to promote, develop and maintain itself as a bird sanctuary in which it is prohibited for any person to injure, kill, hunt, destroy, capture or molest any endangered, threatened, rare, or species of special concern or any bird; except those persons holding a valid permit to destroy birds for scientific purposes issued by the U.S. Fish and Wildlife Service, Department of the Interior.

**Policy 1.4.6**

Certain exotic pest plants shall not be sold, propagated, or planted within the City. If existing on a site to be developed or redeveloped, they shall be removed prior to development. Certain other exotic plants, which are documented to be invasive pests in natural areas, (by the Florida Exotic Pest Plant Council; the Miami-Dade County Department of Parks, Recreation and Open Space's Natural Area's Management Program; and the Miami-Dade County Department of Permitting, Environment and Regulatory Affairs) may not be planted within 500 feet of the native plant communities that they are known to invade. These species referenced in this policy are listed in Tables 5.1 and 5.2.

**Policy 1.4.7**

The City shall promote beautification with an annual clean-up drive for canal shorelines in conjunction with normal trash pick-up activities

**Policy 1.4.8**

The City shall implement appropriate measures to ensure the maintenance of the Melrose/Esplanade Canal by Miami-Dade County and or the City of Miami Springs.

## **Objective 1.5 Floodplain Protection**

*Protect and conserve the natural functions of existing floodplains. This objective shall be measured by implementation of its supporting policies.*

### **Policy 1.5.1**

The City shall enact and enforce land development code provisions governing floodplain protection. Such provisions shall be consistent with this plan and with the applicable Florida statutory and administrative code guidelines. Floodplain protection regulations shall be consistent with applicable standards promulgated by the South Florida Water Management District; the South Florida Regional Planning Council; the Miami-Dade County Department of Permitting, Environment and Regulatory Affairs; the Florida Department of Environmental Protection; and/or other agencies with relevant jurisdiction and/or information. The City shall revise as necessary and enforce flood hazard reduction regulations to ensure: 1) adequate drainage paths around structures to guide storm water runoff; 2) for residential buildings in AE zones, the elevation of the lowest floor and mechanical equipment above the base flood elevation; 3) for nonresidential buildings in AE zones, either the elevation of the lowest floor and mechanical equipment above the base flood elevation or the flood proofing of habitable areas below the base flood elevation; 4) the prohibition of structural fill. The enumeration of specific features of the of flood protection-regulations contained herein shall be interpreted as establishing minimum standards for City regulations, not as precluding additional or higher standards which may have a legitimate public purpose. In addition, the City shall participate in the Community Rating System of the National Flood Insurance Program.

**Table 5.1:  
Exotic Species not to be Planted and to be  
Removed from Development Sites where they Exist**

<b>Species – Latin Name</b>	<b>Species Common Name</b>
<i>Abrus precatorius</i>	Rosary pea
<i>Acacia auriculiformis</i>	Earleaf acacia
<i>Adenanthera pavonina</i>	Red beadtrees, red sandalwood, coralwood, redwood, circassian bean tree, peacock flower-fence, coral pea, Barbados pride
<i>Albizia lebbek</i>	Woman's tongue, lebbeck tree, siris tree
<i>Antigonon leptopus</i>	Coral vine, queen's jewels
<i>Ardisia crenata</i>	Scratchthroat, coral ardisia
<i>Ardisia elliptica</i>	Shoebutt, shoebutt ardisia
<i>Bischofia javanica</i>	Javanese bishopwood, bishopwood, bischofia, toog
<i>Casuarina spp.</i>	Australian pine, sheoak, beefwood
<i>Cestrum diurnum</i>	Dayflowering jessamine, day blooming jasmine, day blooming jasmine, day jessamine
<i>Cinnamomum camphora</i>	Camphortree, camphor tree
<i>Colubrina asiatica</i>	Asian nakedwood, leatherleaf, latherleaf
<i>Cupaniopsis anacardioides</i>	Carrotwood
<i>Dalbergia sissoo</i>	Indian Rosewood, sissoo
<i>Dioscorea alata</i>	White yam, winged yam
<i>Dioscorea bulbifera</i>	Air potato, bitter yam, potato vine
<i>Eichhornia crassipes</i>	Common water-hyacinth, water-hyacinth
<i>Ficus altissima</i>	Council tree, lofty fig, banyan tree, false banyan
<i>Ficus benghalensis</i>	Banyan tree, banyan fig, Indian banyan, East Indian fig tree, bengal fig
<i>Ficus microcarpal</i>	Indian laurel, laurel fig, Malay banyan, Chinese banyan, glossy leaf banyan
<i>Flacourtia indica</i>	Governor's plum, Madagascar plum, batoko plum, ramonchi
<i>Hydrilla verticillata</i>	Waterhyme, hydrilla
<i>Hygrophila polysperma</i>	Indian swampweed, green hygro
<i>Hymenachne amplexicaulis</i>	Trompetilla, West Indian marsh grass
<i>Imperata cylindrica</i>	Cogongrass
<i>Ipomea aquatica</i>	Water-spinach
<i>Jasminum dichotomum</i>	Gold Coast jasmine
<i>Jasminum fluminense</i>	Brazilian jasmine, jazmin de trapo
<i>Leucaena leucocephala</i>	White leadtree, lead tree, jumbie bean, tan-tan
<i>Ludwigia peruviana</i>	Peruvian primrosewillow
<i>Lygodium spp. except L. palmatum</i>	Climbing fern, e.g. Old World climbing fern, Japanese climbing fern
<i>Macfadyena unguis-cati</i>	Catclawvine
<i>Melaleuca quinquenervia</i>	Punk tree, melaleuca, cajeput, paperbark tree, tea tree, swamp tea tree
<i>Melia azedarach</i>	Chinaberrytree, Chinaberry
<i>Merremia tuberosa</i>	Spanish arborvine, yellow morning-glory, woodrose, Hawaiian woodrose, ceylon morning glory, Spanish wood vine
<i>Mimosa pigra</i>	Black mimosa, Catclaw mimosa
<i>Neyraudia reynaudiana</i>	Burmareed, silkreed
<i>Paederia spp.</i>	Sewervine, skunkvine, onion vine
<i>Panicum repens</i>	Torpedograss

<i>Pennisetum purpureum</i>	Elephantgrass, Napiergrass
<i>Pistia stratiotes</i>	Water lettuce
<i>Pueraria montana</i> var. <i>lobata</i>	Kudzu
<i>Rhodomyrtus tomentosa</i>	Rose myrtle, Downy rose-myrtle
<i>Rhynchelytrum repens</i>	Rose natalgrass, Natal grass
<i>Ricinus communis</i>	Castorbean, castor oil plant, palma christi, wonder tree
<i>Sapium sebiferum</i>	Popcorn tree, Chinese tallow tree
<i>Scaevola taccada</i>	Beach naupaka, scaevola, half-flower
<i>Schefflera actinophylla</i>	Australian umbrella tree, octopus tree, Queensland umbrella tree, umbrella tree, rubber tree, starleaf
<i>Schinus terebinthifolius</i>	Brazilian pepper, Christmas berry tree, Florida holly
<i>Senna pendula</i> var. <i>glabrata</i>	Valamuerto, Climbing cassia, Christmas cassia, Christmas senna
<i>Solanum tampicense</i>	Aquatic soda apple, wetland nightshade
<i>Solanum viarum</i>	Tropical soda apple
<i>Talipariti tiliaceum</i>	Mahoe, sea hibiscus, yellow mahoe
<i>Tectaria incisa</i>	Incised halberd fern
<i>Thespesia populnea</i>	Portia tree, seaside mahoe, cork tree, false rosewood
<i>Tribulus cistoides</i>	Puncture vine, burrnut, Jamaican feverplant, billy-goat weed, large yellow caltrop
<i>Urochloa mutica</i>	Paragrass

**Table 5.2:  
Exotic Species not to be Planted within 500 feet of Native Plant Communities**

<b>Species Latin Name</b>	<b>Species Common Name</b>
<i>Bauhinia variegata</i>	orchid tree
<i>Bauhinia purpurata</i>	orchid tree
<i>Calophyllum calaba</i>	Mastwood
<i>Catharanthus roseus</i>	Madagascar periwinkle
<i>Derris Indica</i>	pongam
<i>Eugenia uniflora</i>	Surinam cherry
<i>Epipremnum pinnatum</i> cv. <i>Aureum</i>	pothos
<i>Kalanchoe pinnata</i>	life plant
<i>Lantana camera</i>	Lantana
<i>Murraya paniculata</i> (orange jessamine)	orange jessamine
<i>Pittosporum tobira</i> (pittosporum)	Japanese pittosporum
<i>Pouteria campechiana</i>	canistel
<i>Psidium guyava</i>	Guava
<i>Psidium littorale</i>	Cattley guava
<i>Rhoeo spathacea</i>	oyster plant
<i>Sansevieria hyacinthoides</i> (= <i>S. trifasciata</i> )	bowstring hemp
<i>Syngonium podophyllum</i>	arrowhead
<i>Syzygium cumini</i>	jambolan; Java plum
<i>Syzygium jambos</i>	rose apple
<i>Terminalia catappa</i>	tropical almond
<i>Washingtonia</i> spp.	Washington Palm
<i>Wedelia trilobata</i>	wedelia
<i>Zebrina pendula</i>	wandering zebra

## RECREATION AND OPEN SPACE ELEMENT

### **GOAL 1 PROVIDE A DESIRABLE LEVEL OF PUBLIC RECREATION AND OPEN SPACE FACILITIES TOGETHER WITH SUPPLEMENTAL PRIVATE RECREATION AND OPEN SPACE FACILITIES.**

#### **Objective 1.1 Access to Recreation Sites**

*In general, ensure access to identified sites, including freshwater shores. In particular, expand and protect public access to existing recreation sites, school sites, and the Miami River Canal shore line.*

##### **Policy 1.1.1**

The City shall seek collocation agreements, whenever feasible, with the Miami-Dade County School Board to make school recreational facilities accessible to the residents and with the Miami-Dade County Water and Sewer Department, and other appropriate agencies to assure resident's access to appropriate public facilities.

#### **Objective 1.2 Public-Private Coordination**

*In general, coordinate public and private resources to meet recreation demand.*

##### **Policy 1.2.1**

The City of Miami Springs shall work with public agencies; such as Miami-Dade County Department of Permitting, Environment and Regulatory Affairs; the Army Corp of Engineers; the Florida Department of Environmental Protection; the South Florida Water Management District; Miami-Dade County School Board and private sector organizations and corporations, through the zoning process and other recreation and open space initiatives, to expand, enhance and improve recreation/open space facilities.

#### **Objective 1.3 Adequate and Efficient Provision of Public Recreation Facilities and Open Space**

*In general, ensure that parks and recreation facilities are adequately and efficiently provided.*

##### **Policy 1.3.1**

The City shall aggressively seek additional acreage designated for Recreation and Open Space uses and shall reserve for recreation use all of the City-owned land designated for recreation on the Future Land Use Map and designated in the inventory of recreation facilities included as Exhibit 1 for the Recreation

and Open Space Element.

**Policy 1.3.2**

The land area designated as the City of Miami Springs Municipal Golf Course shall be regulated with an appropriate Future Land Use Map designation and an appropriate zoning map designation to provide for its use as a golf course.

**Policy 1.3.3**

The City shall maintain agreements and pursue new collocation agreements permitting local recreation use of Miami-Dade County and the Miami-Dade County School Board sites in the City.

**Policy 1.3.4**

The City shall continue to apply for State and Federal grant funds for the expansion and improvement of public recreation and open space.

**Policy 1.3.5**

The City shall invest its own funds and/or pursue other financing to acquire and develop bicycle and pedestrian paths and other access along City canals, including the Miami River Canal and the Ludlam Canal.

**Policy 1.3.6**

For recreational sites, a level of service standard shall be set at 2.0 acres of per one thousand (1,000) permanent population. This standard shall be incorporated in the Land Development Code. The 2.0 acre per 1,000 standard shall be in addition to the Miami Springs Golf Course.

**Policy 1.3.7**

The City shall create a Recreation and Open Space Master Plan ~~by 2016~~ which will address the current and future needs of City residents, possible sites for new projects as well as coordination and integration of recreation and open space goals with the other Elements of the Comprehensive Plan. The Plan will include potential funding sources that will allow the enhancement and expansion of the City's recreation and open space system.

**Objective 1.4      Provision of Private Open Space**

*Assure the provision of open space by private enterprise.*

**Policy 1.4.1**

The City shall enact and enforce land development code standards and incentives to achieve open space and landscaping requirements. Open space and landscaping requirements shall specify above average quantities of plant and other landscaping material and extensive use of native and water conserving plant materials and design techniques for non-residential uses. Landscaping regulations shall include, but not necessarily be limited to, establishing a minimum number of trees based on lot size and/or lot frontage, establishing minimum requirements for other plant material, and establishing irrigation restrictions which minimize water loss due to evaporation. Regulations shall address site perimeters, parking lots and residential buffers.

**Table 6.1:  
Recreation Inventory**

**Existing Public Facilities in the City:** Recreational facilities on public land and accessible to the general population of the Miami Springs are depicted on Figure 1.1, Existing Land Use Map. The key numbers on that map correspond to the following list:

1.	<b>Cinema Park (City Tennis Courts)</b> 401 Westward Drive Size: 1.0 acres Facilities: Five lighted tennis courts; lighted handball court	Type: Community
2.	<b>Circle Park</b> Curtiss Parkway at Miami Springs Circle Size: 1.6 acres Facilities: Passive park with benches	Type: Neighborhood
3.	<b>Crane Park</b> Quail Avenue and N Royal Poinciana Boulevard Size: 1.0 acres Facilities: Passive park	Type: Neighborhood
4.	<b>De Leon Park</b> De Leon Drive Size: 0.3 acres Facilities: Passive park with benches	Type: Neighborhood
5.	<b>East Drive Field (Stafford Park)</b> East Drive and Labaron Drive Size: 9.2 acres Facilities: Lighted baseball; lighted softball; lighted soccer; lighted VITA course; to lot; picnic area	Type: Community
6.	<b>Prince Field</b> 1400 Westward Drive Size: 3.6 acres Facilities: Football; baseball; softball; soccer; track; tot lot; 1,535 sq. ft. field house	Type: Community
7.	<b>Ragan Park</b> Labaron Drive between Lee Drive and Ragan Drive Size: 1.0 acres Facilities: Passive park	Type: Neighborhood
8.	<b>Recreation Center</b> 1401 Westward Drive Size: 3.6 acres Facilities: Indoor gymnasium; swimming pool; administrative office	Type: Community
9.	<b>Rio Vista Drive Park</b> Rio Vista Drive and North Royal Poinciana Boulevard Size: 0.6 acres Facilities: Passive Park	Type: Neighborhood
10.	<b>South Bass Lake Park</b> Bluebird Avenue South to lake Size: 0.5 acres Facilities: Passive park	Type: Neighborhood
11.	<b>Dove Avenue Park/Peony Field</b> N. Royal Poinciana Boulevard and Dove Avenue Size: 5.8 acres Facilities: Playing fields	Type: Community
<b>Canal Bank, Parkway &amp; Traffic Islands</b>		
12.	<b>Canal Bank of C-6 Miami Canal Dove Avenue to Redbird Avenue</b>	Size: 2.1 acres
13.	<b>Parkway at Azure Way</b>	Size: 0.2 acres
14.	<b>Traffic Island at Corydon Drive &amp; Lenape (pump station)</b>	Size: 0.1 acres
15.	<b>Traffic Island /Triangle at Hunting Lodge Drive, Lenape Drive, Melrose Canal</b>	Size: 0.4 acres
16.	<b>Traffic Island / Triangle at Lake Drive &amp; Morningside Drive</b>	Size: 0.1 acres
17.	<b>Traffic Island at North Royal Poinciana Boulevard &amp; Starling Avenue</b>	Size: 0.4 acres
18.	<b>Yacht Basin (Outgoing Bridge)</b>	Size: 0.9 acres

<b>Total Community Park Acreage:</b>	<b>23.2 Acres</b>
<b>Total Neighborhood Park Acreage:</b>	<b>4.5 Acres</b>
<b>Total Canal Bank, Parkway and Traffic Island:</b>	<b>4.2 Acres</b>
<b>Total of all Park Acreage:</b>	<b>32.0 Acres</b>

**City of Miami Springs Golf Club:** The City of Miami Springs Golf Club occupies approximately **176.5 acres** of Miami Springs.

**Additional Open Space:** Additional open space facilities exist within platted road rights-of-way. These include the center parkway of Curtiss Parkway, which includes a bike path flanked by rows of live oaks, the area between the Canal Street pavement and the C-6 Canal, including the improved passive park area east of the bus shelter, and traffic circles at Beverly Drive and White thorn Drive Beverly Drive and Glendale Drive, South Drive and Pinecrest Drive, and De Soto Drive and Labaron Drive.

## INTERGOVERNMENTAL COORDINATION ELEMENT

**GOAL 1 TO MAINTAIN OR ESTABLISH PROCESSES TO ASSURE COORDINATION WITH OTHER GOVERNMENTAL ENTITIES WHERE NECESSARY TO IMPLEMENT THIS PLAN.**

**Objective 1.1 Coordinate with the Plans of Other Jurisdictions and Agencies**

*In general, coordinate the Miami Springs Comprehensive Plan with the plans of adjacent jurisdictions and agencies. In particular, achieve maximum feasible levels of consistency between the plans for Miami Springs, the Miami- Dade County School Board, Miami-Dade County, Virginia Gardens, Hialeah, the South Florida Water Management District, and the Florida Department of Transportation.*

### **Policy 1.1.1**

The City shall monitor the planning process as the Miami-Dade County Comprehensive Development Master Plan is updated and revised.

### **Policy 1.1.2**

The City shall monitor the planning process as the Virginia Gardens, Hialeah, and Medley Comprehensive Plans are updated and revised.

### **Policy 1.1.3**

The City shall maintain active participation in the Miami Springs/Virginia Gardens Miami International Airport Ad Hoc Committee. Pursuant to such participation the City shall pursue implementation of the Ad Hoc Committee's Phase I program or an appropriate modification thereof.

### **Policy 1.1.4**

The City shall actively coordinate with South Florida Water Management District in its efforts pertaining to the development and implementation of its *Five-Year Lower East Coast Water Supply Plan*.

### **Policy 1.1.5**

Miami Springs shall adopt and implement a water supply facilities work plan for at least a ten-year planning period that reflects coordination with the South Florida Water Management District's Lower East Coast Water Supply Plan Update within 18 months after updates or amendments to it are approved by the District.

**Policy 1.1.6**

Miami Springs shall actively support its potable water supply provider's efforts to develop alternate water supply sources as approved by the SFWMD.

**Policy 1.1.7**

Miami Springs' staff shall meet annually with Miami-Dade Water and Sewer Department to coordinate and verify information related to the City's projected water supply needs and the County's commitment to supply that projected demand.

**Policy 1.1.8**

The City shall maintain active participation in the planning process of the Miami-Dade County Aviation Department with respect to Miami International Airport planning.

**Policy 1.1.9**

The City shall actively participate in the planning activities of the Miami- Dade County Public Works Department, Highway Division.

**Policy 1.1.10**

The City shall coordinate with the Miami-Dade County Department of Planning, Development and Regulation in the administration of the South Florida Building Code.

**Policy 1.1.11**

The City shall coordinate with the Metropolitan Department of Planning, Development and Regulation in the administration of the Miami-Dade County Subdivision Regulations (Chapter 28 of the Miami-Dade County Code, as may be amended).

**Policy 1.1.12**

Dispute Resolution Process, The City of Miami Springs shall utilize the South Florida Regional Planning Council's dispute resolution process to resolve disputes or conflicts, on planning, growth management, related issues between other local governments. When the City's efforts fail to resolve a dispute with any local government, the City shall notify the Regional Planning Council in writing about the dispute, requesting the Council's mediation. The City shall also notify the local government that the City has requested mediation assistance from the South Florida Regional Planning Council.

### **Policy 1.1.13 - Reserved**

### **Policy 1.1.14**

The City shall apply with the Miami-Dade County Office of Community and Economic Development (OCED) for housing purchase, rehabilitation and code enforcement funds under Miami-Dade County's Community Development Block Grant Program. The City shall also encourage homeowners, non-profit organizations, and local businesses to apply to programs that offer housing and business development funding by disseminating information regarding such programs.

### **Policy 1.1.15**

The City shall actively cooperate and coordinate with the Florida Department of Transportation, District 6 Office, and the Metropolitan Planning Organization in their planning for state roads, transit facilities and services and aviation facilities and services in and near the City.

### **Policy 1.1.16**

The City shall maintain an active dialogue with the Miami-Dade County School Board staff relative to any plans for schools within the City and/or for schools which otherwise serve the people of the City.

### **Policy 1.1.17**

The City shall actively cooperate with South Florida Water Management District efforts pertaining to maintenance and operation of the Miami River Canal and other flood control measures.

### **Policy 1.1.18**

The City shall consider as appropriate the informal mediation process of the South Florida Regional Planning Council in order to try to resolve annexation and other conflicts with other governmental entities; the City will enter into mediations on a nonbinding basis.

### **Policy 1.1.19**

The City shall review the relationship of the proposed Future Land Use Map and all amendments thereof to development and development plans in adjacent communities.

### **Policy 1.1.20**

The City of Miami Springs, in conjunction with Miami-Dade County, Miami-

Dade County Public Schools and other affected municipalities, shall follow the procedures established in the adopted Amended and Restated Interlocal Agreement for Public School Facilities Planning in Miami-Dade County (Interlocal Agreement) for coordination and collaborative planning and decision making of land uses, public school facilities siting, decision making on population projections, location and extension of public facilities subject to concurrency, and siting of facilities with countywide significance.

### **Policy 1.1.21**

The City shall coordinate its planning and permitting processes with Miami-Dade County, Miami-Dade County Public Schools, and other parties of the Interlocal Agreement consistent with the procedures established within the Interlocal Agreement as follows:

1. Review and update of the annual Public Schools Work Program, containing the schedule of capital improvements for school facilities needed to achieve and maintain the adopted level of service standards in all concurrency service areas (CSAs) and/or districtwide.
2. Coordinate County and municipal land use planning and permitting processes with Miami-Dade County Public Schools' site selection and planning process to ensure future school facilities are consistent and compatible with land use categories and enable a close integration of existing and planned school facilities and the surrounding land uses.
3. Coordinate the preparation of County and municipal projections for future development with Miami-Dade County Public Schools' school enrollment projections to ensure consistency between the County and municipal future land use maps and the long-term school planning process.
4. Coordinate with Miami-Dade County Public Schools through the Staff Working Group and other committees (as established through the Interlocal Agreement) regarding the preparation of County and municipal annual comprehensive plan updates and the School Board's annual update of the Work Program to ensure consistency between the plans.
5. Coordinate with Miami-Dade County Public Schools on the planning, siting, land acquisition, permitting and development of new school facilities to ensure the availability of public facilities, services and grounds, especially for purposes of exploring collocation opportunities.
6. Revise County and municipal land development codes and Miami-Dade County Public Schools policies to establish a public-school concurrency system.

### **Policy 1.1.22**

Miami Springs shall coordinate with Miami-Dade County, Miami-Dade County Public Schools, and other parties to the Interlocal Agreement during updates or amendments to the City's Comprehensive Plan and updates or amendments for long-range plans for School Board facilities. Amendments to the Public Education Facilities Element shall be initiated following the procedures of the Interlocal Agreement and amendments to the Capital Improvements Element to incorporate the School Board's adopted Work Program shall occur annually.

### **Policy 1.1.23**

Miami Springs shall coordinate with adjacent local governments in providing procedures for joint planning areas.

## **Objective 1.2      Coordinate Impact of Development**

*Establish mechanisms to coordinate the impact of development proposed in the City Comprehensive Plan with other jurisdictions.*

### **Policy 1.2.1**

Miami Springs shall consider initiating, revising and maintaining, as may be appropriate, interlocal agreements generally of the type described below:

Provision of School Board Sites for City Recreation Use: A lease or other agreement by which the City of Miami Springs would commit to develop and maintain recreation facilities on School Board sites.

Provision of City Sites for School Board Recreation Use: A lease or other agreement by which the City would provide sites for School Board recreation use.

Use of Dade County School Board Facilities: An agreement to cooperate and coordinate with the Dade County School Board for community use of public-school grounds within the City.

### **Policy 1.2.2**

The City shall assist the County in providing information to the residents of the City about services provided directly or indirectly by the County, e.g., solid waste, potable water, sewers, transit and hurricane response planning. Such information may be disseminated through a City newsletter, City Hall counter handouts, notices posted at the City Hall, and/or other appropriate means.

### **Policy 1.2.3**

The City will thoroughly review and compare proposed development in Miami-Dade County, Virginia Gardens, Hialeah and Medley with proposed development in the Miami Springs Comprehensive Plan for consistencies and conflicts between identical elements and between plans as a whole. Where appropriate, Miami Springs will respond at public hearings, through memoranda, or through the regional planning council's mediation process. Where appropriate, Miami Springs will consider the comments of other jurisdictions made at Miami Springs' public hearings or otherwise communicated to the City.

## **Objective 1.3      Coordinate Level of Service Standards**

*Ensure coordination with Miami-Dade County in establishing level-of-service standards for: 1) roads; 2) transit service; 3) sanitary sewage; 4) potable water; and 5) solid waste.*

### **Policy 1.3.1**

Miami Springs shall monitor changes to the adopted level-of-service standards of adjacent municipalities and jurisdictions, including City of Hialeah, Village of Virginia Gardens, and Miami-Dade County, and adjust its own level-of-service standards accordingly.

### **Policy 1.3.2**

The City shall coordinate with Miami-Dade County Public Schools, Miami-Dade County and other parties to the Interlocal Agreement to establish and maintain adopted Level of Service Standards (including interim LOS standards) for public school facilities and any amendments affecting public school concurrency.

## CAPITAL IMPROVEMENTS ELEMENT

**GOAL 1            UNDERTAKE CAPITAL IMPROVEMENTS NECESSARY TO PROVIDE ADEQUATE INFRASTRUCTURE AND A HIGH QUALITY OF LIFE FOR RESIDENTS OF MIAMI SPRINGS USING SOUND FISCAL PRACTICES.**

**Objective 1.1      Annual Capital Improvements Programming Process**

*In general, use the capital improvements element as a means to correct existing deficiencies, accommodate desired future growth and replace obsolete or worn-out facilities. In particular, use this Element as the framework to monitor public facility needs and prepare the annual capital budget and five-year Capital Improvements Program.*

**Policy 1.1.1**

In setting priorities, the following kinds of criteria shall be used by the City Council; in all cases, budget impact will be assessed:

- Public safety projects: any project to reduce a threat to public health or safety.
- Quality of life projects: any project that would enhance the quality of life, such as a public streetscape improvement project.
- Level of service or capacity projects: any project needed to maintain an adopted or otherwise desirable Level of Service.
- Redevelopment projects: any project that would assist in the revitalization of deteriorated non-residential properties.
- Environmental enhancement projects: any project which would enhance the environmental quality of the Miami River Canal, the Ludlam Canal, the Melrose Canal, the Esplanade Canal or natural resources.

**Policy 1.1.2**

The City shall prudently limit the amount of debt it assumes for capital improvements or other purposes. At a minimum, the City shall not assume debt obligations which would result in the City exceeding the debt ratios established by state law and City Charter.

**Policy 1.1.3**

The City shall maintain a current inventory of all City-owned capital facilities, to include information on type, capacity, current and committed demand, location and condition.

**Policy 1.1.4**

The City shall regularly schedule inspections of all capital facilities to monitor and record the condition of each.

**Policy 1.1.5**

The City shall use designated funding mechanisms such as the drainage utility and sewer assessments to the maximum extent feasible thereby freeing up general funds (and general obligation bonds) for such City-wide projects as park land acquisition and streetscape work as outlined in the policies of other Comprehensive Plan elements.

**Policy 1.1.6**

The City shall prepare and adopt each year a five-year capital improvements program to include all projects which entail expenditures of at least \$50,000. Staff and engineering studies and other appropriate studies shall form the basis for preparation of a five-year capital improvement program, including one year capital budget.

**Policy 1.1.7**

The City will implement the projects listed in the capital improvement program. A plan amendment shall be required to eliminate, defer, or delay construction of any road or mass transit facility or service which is needed to maintain the adopted LOS and which is listed in the five-year schedule of capital improvements.

**Policy 1.1.8**

Amendments to the Capital Improvements Element shall be made annually to set forth a plan which demonstrates that the adopted LOS standards will be achieved and maintained through the five-year planning horizon.

**Objective 1.2      Coordinate Land Use, Financial Resources and Level of Service Standards**

*To coordinate future land use decisions with existing and planned capital facilities using the adopted level of service standards contained in this Element.*

**Policy 1.2.1**

The following Level of Service (LOS) standards shall be maintained:

**Streets:** The City shall regulate the timing of development to maintain at least the following peak period hour Level of Service standards on roadways that

lie within its municipal boundaries:

- The level of service standard adopted by the Miami-Dade County Comprehensive Development Master Plan for all state and county roadways within Miami Springs.
- Level of service "D" for all local roads within Miami Springs.

For the purpose of this policy, the "peak period hour" or PPH shall be the average of the two highest consecutive hours.

**Sanitary Sewers:** The City shall secure adequate wastewater treatment capacity from the Miami-Dade Water and Sewer Department. Regional wastewater treatment plants shall operate with a physical capacity of no less than the annual average daily sewage flow. Effluent discharged from wastewater treatment plants shall meet all federal, State and County standards. The system shall maintain the capacity to collect and dispose of 102 percent of average daily sewage demand for the preceding 5 years.

**Potable Water:** The City shall secure adequate potable water supply from the Miami-Dade Water and Sewer Department to provide an average of 155 94 gallons of water per capita per day. In addition, the City shall enforce the following standards through its Interlocal agreement with the Miami-Dade Water and Sewer Department:

- a) The regional treatment system shall operate with a rated maximum daily capacity of no less than 2 percent about the maximum daily flow for the preceding year, and an average daily capacity 2 percent above the average daily system demand for the preceding 5 years. The maximum daily flow shall be determined by calculating the average of the highest five single day flows for the previous 12 months.
- b) Water shall be delivered to users at a pressure of no less than 20 pounds per square inch (psi) and no greater than 100 psi. Unless otherwise approved by the Miami-Dade Fire Department, minimum fire flows based on the land use served shall be maintained as follows:

<u>Land Use Min.</u>	<u>Fire Flow (gpm)</u>
Single Family Residential Estate:	500
Single Family and Duplex: (Residential: on minimum lots of 7,500 sf)	750
Multi-Family Residential:	1,500
Semiprofessional Offices, Hospitals, Schools:	2,000
Business and Industry:	3,000

- c) Water quality shall meet all federal, state, and county primary standards for

potable water.

- d) Countywide storage capacity for finished water shall equal no less than 15 percent of the Countywide average daily demand.

***Drainage:*** All nonresidential development and redevelopment shall adequately accommodate runoff to meet all Federal, state and local requirements. Stormwater shall be treated in accordance with the state law. One inch of runoff shall be retained on site. Post-development runoff shall not exceed peak pre development runoff.

***Solid Waste:*** The County solid waste disposal system shall maintain a minimum of five years capacity. For City planning purposes, a generation rate of 5.2 pounds per person per calendar day shall be used.

***Parks:*** The City shall achieve and maintain a Level of Service standard of at least 2.0 acres of public park and recreation lands per 1,000 permanent population. This standard shall be maintained without including the acreage of the Miami Springs Golf Course.

***Public Schools:***

The adopted level of service (LOS) standard for all Miami-Dade County public school facilities is 100 percent utilization of Florida Inventory of School Houses (FISH) Capacity (with re-locatable classrooms). This LOS standard, except for Magnet Schools, is applicable in each public-school concurrency service area (CSA), defined as the public school attendance boundary established by the Miami-Dade County Public Schools. The adopted LOS standard for Magnet Schools is 100 percent of FISH (With re-locatable classrooms), which is calculated on a district wide basis. Level of Service standards for public school facilities apply to those traditional educational facilities, owned and operated by the Miami-Dade County Public Schools, that are required to serve the residential development within their established Concurrency Service Area. Level of Service standards do not apply to charter schools. However, the capacity of both charter and magnet schools will be credited against the impact of development. No credit against the impact of development is given for either magnet or charter schools if their district wide enrollment is at, or above, 100 percent FISH capacity.

In addition, the cities and County of Miami-Dade aspire to achieve 100 percent utilization of permanent FISH (No re-locatable Classrooms) by January 1, 2018. Miami-Dade County Public Schools shall continue to decrease the number of re-locatable classrooms over time. Public school facilities that achieve 100 percent of Permanent FISH capacity shall, to the extent possible, no longer utilize re-locatable classrooms, except as an operation solution, such as to achieve the level of service standard during replacement, remodeling, renovation or expansion of a public-school facility. By December 2010, Miami-Dade County in cooperation with Miami-Dade

County Public Schools will assess the viability of modifying the adopted LOS standard to 100 percent utilization of Permanent FISH (No re-locatable Classrooms) for all CSAs.

### **Policy 1.2.2**

The City shall continue identifying and pricing land available for park and recreation facilities so that this information can be considered in the development of the City's Fiscal Year 2011/12 – 2015/16 Capital Improvement Program.

### **Policy 1.2.3**

Miami Springs hereby adopts by reference, the Miami-Dade County Comprehensive Development Master Plan Amendments adopted February 4, 2015, the Miami-Dade Water and Sewer Department 20-year Water Supply Facilities Work Plan (2014-2033) Support Data (November 2014), the 2013 2018 Lower East Coast Water Supply Plan Update (LEC) approved by the South Florida Water Management District (SFWMD) on October 10, 2013 November 8, 2018 and additional information found within Water Use Permit 13-00017-W are herein incorporated by reference. The Water Use Permit which was modified and approved by the SFWMD on February 9, 2015, will now expire on February 9, 2035. Currently, WASD is preparing to submit a WUP modification that will include updated water demand projections based on revised population data and is requesting an extension of the permit duration through the year 2040.

### **Policy 1.2.4**

Miami Springs shall adopt and implement a water supply facilities work plan for at least a ten-year planning period that reflects coordination with the South Florida Water Management District's Lower East Coast Water Supply Plan Update within 18 months after updates or amendments to it are approved by the District.

### **Policy 1.2.5**

Prior to approval of a building permit or its functional equivalent, the City shall consult with the Miami-Dade County Water and Sewer Department, the City's water supplier, to determine whether supplies to serve the new development will be available no later than the anticipated date of issuance of certificate of occupancy or its functional equivalent by the City.

**Objective 1.3** *The City in collaboration with Miami-Dade County Public Schools, Miami- Dade County and other parties to the Amended and Restated Interlocal Agreement for Public School Facilities Planning (Interlocal Agreement), shall ensure that public school facilities are available for current and future students consistent*

*with available financial resources and the adopted Level of Service (LOS). This shall be measured by the School District's enrollment projections compared to the Miami-Dade County Public Schools Facilities Work Program, as adopted by reference into the Capital Improvement Element.*

**Policy 1.3.1**

Consistent with policies and procedures within the Interlocal Agreement, the Public Schools Facilities Work Program will contain a five-year financially feasible schedule of capital improvements to address existing deficiencies and achieve and maintain the adopted LOS. This financially feasible schedule shall be updated on an annual basis and annually adopted into the Capital Improvements Element.

The City hereby adopts, by reference, the *Miami-Dade County Public School Facilities Work Plan*, effective September 2009, authored by the Miami-Dade County Public School District and through its annual update to the Capital Improvements Schedule, will incorporate by reference the latest adopted version of the Miami-Dade County Public Schools Facilities Work Program and concurrency maps.

**Policy 1.3.2**

Miami-Dade County Public Schools and all parties, including the City of Miami Springs, of the Interlocal Agreement have the responsibility for providing school concurrency related capital improvements and should continually seek to expand the funding sources available to meet those requirements.

**Policy 1.3.3**

The Miami-Dade County Public Schools Facilities Work Program will be evaluated on an annual basis to ensure that the level of service standards will continue to be achieved and maintained throughout the planning period.

**Policy 1.3.4**

The adopted LOS for public education facilities shall be maintained as stated in Policy 1.2.1 of this Element.

**Policy 1.3.5**

The adopted LOS shall be applied consistently by Miami-Dade County, Miami-Dade County Public Schools and all parties of the Interlocal Agreement to all schools of the same type.

**Policy 1.3.6**

The City shall support the adoption and application of appropriate funding mechanisms by Miami-Dade County and Miami-Dade County Public Schools in order to assure the fiscal resources to maintain acceptable levels of service. Such funding mechanisms may include special tax districts, municipal taxing service units, local option taxes, user fees, local gas tax, general obligation bonds, impact fees, special purpose authorities, and others as appropriate and feasible.

**Policy 1.3.7**

The provision of infrastructure subject to LOS standards, as it relates to public school concurrency and facility planning, will be done through a process which integrates the City's comprehensive plan, the County's comprehensive plan, and Miami-Dade County Public Schools' functional plans, capital improvements programming, budgeting and financial planning.

## **PUBLIC SCHOOL FACILITIES ELEMENT**

**GOAL 1**            **DEVELOP, OPERATE, AND MAINTAIN A SYSTEM OF PUBLIC EDUCATION BY MIAMI-DADE COUNTY PUBLIC SCHOOLS IN COOPERATION WITH THE COUNTY, LOCAL GOVERNMENTS, AND OTHER APPROPRIATE GOVERNMENTAL AGENCIES, WHICH WILL STRIVE TO IMPROVE THE QUALITY AND QUANTITY OF PUBLIC EDUCATIONAL FACILITIES AVAILABLE TO THE CITIZENRY OF MIAMI-DADE COUNTY, FLORIDA.**

**Objective 1.1**    *The City shall work in conjunction with Miami-Dade County Public Schools towards the reduction of the overcrowding which currently exists in the public school system, while striving to attain an optimum level of service pursuant to Objective 1.2.*

### **Policy 1.1.1**

The City shall cooperate with Miami-Dade County Public Schools in its efforts to continue to provide new student stations through the Capital Outlay Program, in so far as funding is available.

### **Policy 1.1.2**

The City shall collect impact fees from new development and redevelopment for transfer to Miami-Dade County Public Schools to offset the impacts of additional students on the capital facilities of the school system.

### **Policy 1.1.3**

Miami Springs shall cooperate with Miami-Dade County Public Schools in its efforts to develop and implement alternative educational facilities, such as primary learning centers, which can be constructed on small parcels of land and relieve overcrowding at elementary schools, in so far as funding and rules permit.

### **Policy 1.1.4**

The City shall cooperate with Miami-Dade County Public Schools in its efforts to provide public school facilities to the students of Miami-Dade County, which operate at optimum capacity, in so far as funding is available. Operational alternatives may be developed and implemented, where appropriate, which mitigate the impacts of overcrowding while maintaining the instructional integrity of the educational program.

### **Policy 1.1.5**

The City shall cooperate with Miami-Dade County Public Schools in its efforts to maintain and/or improve the established level of service (LOS), for Public Educational Facilities, as established for the purposes of public-school concurrency.

### **Policy 1.1.6**

The Miami-Dade County School Board (School Board) comments shall be sought and considered on comprehensive plan amendments and other land use and zoning decisions which could impact the school district, in order to be consistent with the terms of the state mandated Public School Facilities Planning Interlocal Agreement pursuant to Sections 1013.33 and 163.31777, Florida Statutes.

### **Policy 1.1.7**

The City shall coordinate, to the extent feasible, with Miami-Dade County Public Schools regarding the school district's capital improvement programming and student population projections. Capital Improvement programming by Miami-Dade County Public Schools should be based on future enrollment projections and demographic shifts and targeted to enhance the effectiveness of the learning environment. The future enrollment projections should utilize student population projections based on information produced by the demographic, revenue, and education estimating conferences pursuant to Section 216.136, Florida Statutes, where available, as modified by the School Board based on development data and agreement with the local governments, the State Office of Educational Facilities and the State SMART Schools Clearinghouse. The School Board may request adjustment to the estimating conferences' projections to reflect actual enrollment and development trends. In formulating such a request, the School Board will coordinate with Miami-Dade County and appropriate municipalities regarding development trends and future population projections.

### **Policy 1.1.8**

The City shall support Miami-Dade County's policy to request that Miami-Dade County Public Schools should give priority to the Urban Infill Area (UIA) identified in Miami-Dade County's Comprehensive Development Master Plan (CDMP) Capital Improvements Element when allocating resources toward the attainment of the level of service objective for public educational facilities (Objective 1.2), followed by more recently developed and newly developing areas outside the UIA and within the Urban Development Boundary (UDB).

### **Policy 1.1.9**

Miami Springs, through the Staff Working Group of the Amended and Restated Interlocal Agreement for Public School Facilities (Interlocal Agreement), shall coordinate with Miami-Dade County Public Schools, Miami-Dade County, and applicable cities to annually review the Public Education Facilities Element and school enrollment projections.

**Objective 1.2** *The City shall coordinate new residential development with the future availability of public-school facilities consistent with the adopted level of service standards for public school concurrency, to ensure the inclusion of those projects necessary to address existing deficiencies in the five-year schedule of capital improvements, and meet future needs based upon achieving and maintaining the adopted level of service standards throughout the planning period.*

### **Policy 1.2.1**

The City shall amend its plan annually to adopt a new fifth year, updating the financially feasible public schools capital facilities program, coordinating the program with the 5-year school district facilities work plan, the plans of other local governments and as necessary, updates to the concurrency service area maps.

### **Policy 1.2.2**

The adopted level of service (LOS) standard for all Miami-Dade County Public Schools' facilities is 100 percent utilization of Florida Inventory of School Houses (FISH) Capacity (With Relocatable Classrooms). This LOS standard, except for Magnet Schools, shall be applicable in each public-school concurrency service area (CSA), defined as the public school attendance boundary established by Miami-Dade County Public Schools. The adopted LOS standard for Magnet Schools is 100 percent of FISH (With Relocatable Classrooms), which shall be calculated on a district wide basis. Level of Service standards for public school facilities apply to those traditional educational facilities, owned and operated by Miami-Dade County Public Schools that are required to serve the residential development within their established Concurrency Service Area. Level of Service standards do not apply to charter schools. However, the capacity of both charter and magnet schools will be credited against the impact of development. No credit against the impact of development shall be given for either magnet or charter schools if their district wide enrollment is at, or above, 100 percent FISH capacity.

### **Policy 1.2.3**

It is the goal of Miami-Dade County Public Schools, Miami-Dade County, and parties of the Amended and Restated Interlocal Agreement for Public

School Facilities Planning, including the City of Miami Springs, for all public-school facilities to achieve 100 percent utilization of Permanent FISH (No Relocatable Classrooms). To help achieve the desired 100 percent utilization of Permanent FISH by 2018, Miami-Dade County Public Schools should continue to decrease the number of relocatable classrooms over time. Public school facilities that achieve 100 percent utilization of Permanent FISH capacity should, to the extent possible, no longer utilize relocatable classrooms, except as an operational solution, such as to achieve the level of service standard during replacement, remodeling, renovation or expansion of a public-school facility.

#### **Policy 1.2.4**

In the event the adopted LOS standard in a CSA cannot be met as a result of a proposed development's impact, the development may proceed, provided at least one of the following conditions is met:

1. The development's impact can be shifted to one or more contiguous CSAs that have available capacity and is located, either in whole or in part, within the same Geographic Areas (Northwest, Northeast, Southwest, or Southeast, see Figure 1A through 1D) as the proposed development; or
2. The development's impact is mitigated, proportionate to the demand for public schools it created, through a combination of one or more appropriate proportionate share mitigation options, as defined in Section 163.3180 (13)(e) 1, Florida Statutes. The intent of these options is to provide for the mitigation of residential development impacts on public school facilities, guaranteed by a legal binding agreement, through mechanisms that include, one or more of the following: contribution of land; the construction, expansion, or payment for land acquisition or construction of a permanent public school facility; or, the creation of a mitigation bank based on the construction of a permanent public school facility in exchange for the right to sell capacity credits. The proportionate share mitigation agreement is subject to approval by Miami-Dade County School Board and Miami Springs City Council must be identified in the Miami-Dade County Public Schools Facilities Work Program.
3. The development's impacts are phased to occur when sufficient capacity will be available.
4. If none of the above conditions are met, the development shall not be approved.

### **Policy 1.2.5**

Concurrency Service Areas (CSA) shall be delineated to:

1. Maximize capacity utilization of the facility;
2. Limit maximum travel times and reduce transportation costs;
3. Acknowledge the effect of court-approved desegregation plans;
4. Achieve socio-economic, racial, cultural and diversity objectives; and
5. Achieve other relevant objectives as determined by the School Board's policy on maximization of capacity. Periodic adjustments to the boundary or area of a CSA may be made by the School Board to achieve the above stated factors. Other potential amendments to the CSAs shall be considered annually at the Staff Working Group meeting to take place each year, no later than April 30 or October 31, consistent with Section 9 of the Amended and Restated Interlocal Agreement for Public School Facilities Planning.

### **Policy 1.2.6**

The City through the implementation of the concurrency management system and Miami-Dade County Public School Facilities Work Program for educational facilities shall ensure that existing deficiencies are addressed and the capacity of schools is sufficient to support residential development at the adopted level of service (LOS) standards throughout the planning period in the five-year schedule of capital improvements.

### **Policy 1.2.7**

Miami-Dade County Public Schools will provide the City with a copy of its Facilities Work Program annually, pursuant to the timeframes established in the Interlocal Agreement.

### **Policy 1.2.8**

The Miami-Dade County Public Schools Facilities Work Program will be evaluated on an annual basis to ensure that the level of service standards will continue to be achieved and maintained throughout the planning period.

### **Policy 1.2.9**

Miami-Dade County Public Schools shall coordinate with the City to annually update its Facilities Work Program to include existing and anticipated facilities for both the 5-year and long-term planning periods and to ensure that the adopted level of service standard including interim standards, will continue to be achieved and maintained. The City hereby adopts, by reference,

the *Miami-Dade County Public School Facilities Work Plan*, effective September 2009, authored by the Miami-Dade County Public School District and through its annual update to the Capital Improvements Schedule, will incorporate by reference the latest adopted version of the *Miami-Dade County Public Schools Facilities Work Program* and concurrency maps.

**Objective 1.3** *The City shall assist Miami-Dade County Public Schools in obtaining suitable sites for the development and expansion of public education facilities.*

**Policy 1.3.1**

Miami Springs shall support the Miami-Dade County policy that Miami-Dade County Public Schools shall not purchase sites for schools nor build new schools outside of the Urban Development Boundary (UDB), and that new elementary schools constructed should be located at least 1/4 mile inside the UDB; new middle schools should be located at least 1/2 mile inside the UDB, and; new senior high schools should be located at least one mile inside the UDB. In substantially developed areas of the County where suitable sites in full conformance with the foregoing are not available and a site or portion of a site for a new school must encroach closer to the UDB, the majority of the site should conform with the foregoing location criteria and the principal school buildings and entrances should be placed as far as functionally practical from the UDB. The same criteria of this paragraph that apply to public schools also pertain to private schools.

**Policy 1.3.2**

In the selection of sites for future educational facility development, the City encourages Miami-Dade County Public Schools to consider whether a school is in close proximity to residential areas and is in a location that would provide a logical focal point for community activities.

**Policy 1.3.3**

The City encourages, where possible, Miami-Dade County Public Schools to seek sites that are adjacent to existing or planned public recreation areas, community centers, libraries, or other compatible civic uses for the purpose of encouraging joint use facilities or the creation of logical focal points for community activity.

**Policy 1.3.4**

Miami Springs acknowledges and concurs that, when selecting a site, Miami-Dade County Public Schools will consider whether the site meets the minimum size criteria as recommended by the State Department of Education or as determined to be necessary for an effective educational environment.

### **Policy 1.3.5**

When considering a site for possible use as an educational facility, Miami- Dade County Public Schools should review the adequacy and proximity of other public facilities and services necessary to the site such as roadway access, transportation, fire flow and potable water, sanitary sewers, drainage, solid waste, police and fire services, and means by which to assure safe access to schools, including sidewalks, bicycle paths, turn lanes, and signalization. The City shall cooperate with Miami-Dade County Public Schools in this review, as appropriate.

### **Policy 1.3.6**

When considering a site for possible use as an educational facility, Miami- Dade County Public Schools should consider whether the present and projected surrounding land uses are compatible with the operation of an educational facility. The City shall cooperate with Miami-Dade County Public Schools in this land use compatibility analysis, as appropriate.

### **Policy 1.3.7**

The City shall encourage and cooperate with Miami-Dade County Public Schools in its effort for public school siting reviews to help accomplish the objectives and policies of this element and other elements of the comprehensive plan. The City shall cooperate with Miami-Dade County Public Schools to establish provisions for a scoping or pre-application meeting as part of the educational facilities review process, if determined to be warranted.

### **Policy 1.3.8**

Miami Springs shall continue to cooperate with Miami-Dade County Public Schools in utilizing Miami-Dade County Public Schools facilities as emergency shelters during emergency situations.

### **Policy 1.3.9**

In furtherance of Objective 1.3 and its associated policies, the City shall encourage Miami-Dade County Public Schools to submit proposed site plans for public school facilities in the City of Miami Springs to the City for its review and comment.

### **Policy 1.3.10**

Maps indicating the current and future public school and ancillary facility locations over the planning period (2009 through 2014) shall be included and updated as need in the Future Land Use Element data and analysis.

**Objective 1.4** *Miami-Dade County and other appropriate agencies and municipalities, will strive to improve security and safety for students and staff.*

**Policy 1.4.1**

The City shall continue to cooperate with Miami-Dade County Public Schools to develop and/or implement programs and policies designed to reduce the incidence of violence, weapons and vandalism on school campuses. Further the City shall encourage the design of facilities, which do not encourage criminal behavior and provide clear sight lines from the street.

**Policy 1.4.2**

The City shall continue to cooperate with Miami-Dade County Public Schools to develop and/or implement programs and policies designed to reduce the number of incidents related to hazardous conditions as reported by the Environmental Protection Agency (EPA), the fire marshal, the State Department of Education (DOE), and other appropriate sources.

**Policy 1.4.3**

Miami Springs shall continue to cooperate with Miami-Dade County Public Schools to provide for the availability of alternative programs for at-risk students at appropriate public educational facilities.

**Policy 1.4.4**

The City shall coordinate with Miami-Dade County Public Schools and municipalities to provide for pedestrian and traffic safety in the area of schools, and signalization for educational facilities.

**Policy 1.4.5**

The City shall coordinate with Miami-Dade County Public Schools' Division of School Police and other law enforcement agencies, where appropriate, to improve and provide for a secure learning environment in the public schools and their vicinity.

**Objective 1.5** *The City shall continue to develop programs and opportunities to bring the schools and community closer together.*

**Policy 1.5.1**

Miami Springs shall cooperate with Miami-Dade County Public Schools in its efforts to provide "full service" schools, parent resource centers, adult and community schools and programs as appropriate.

**Policy 1.5.2**

Miami Springs shall cooperate with Miami-Dade County Public Schools in its efforts to continue to provide opportunities for community and business leaders to serve on committees and task forces, which relate to the development of improved provision of public educational facilities.

**Policy 1.5.3**

The City shall cooperate with Miami-Dade County Public Schools to continue to work with the development industry to encourage partnerships in the provision of sites and educational facilities including early childhood centers.

**Policy 1.5.4**

The City shall cooperate with Miami-Dade County Public Schools through agreement with appropriate agencies to increase medical, psychological, and social services for children and their families as appropriate. The City shall cooperate with Miami-Dade County Public Schools in its efforts to continue to enhance effectiveness of the learning environment.

**Objective 1.6** *The City shall cooperate with Miami-Dade County Public Schools in its efforts to continue to enhance effectiveness of the learning environment.*

**Policy 1.6.1**

The City shall encourage Miami-Dade County Public Schools to continue the design and construction of educational facilities that create the perception of feeling welcome, secure and positive about the students' school environment and experiences.

**Policy 1.6.2**

Miami Springs shall encourage Miami-Dade County Public Schools to continue to design and construct facilities that better provide student access to technology designed to improve learning, such as updated media centers and science laboratories.

**Policy 1.6.3**

The City shall encourage Miami-Dade County Public Schools to continue to improve existing educational facilities, in so far as funding is available, through renovation and expansion to better accommodate increasing enrollment, new educational programs and other activities, both curricular and extra-curricular. The City in conjunction with Miami-Dade County School Board, Miami-Dade County, and other appropriate jurisdictions shall establish

and implement mechanisms for on-going coordination and communication, to ensure the adequate provision of public educational facilities.

**Objective 1.7** *The City in conjunction with Miami-Dade County School Board, Miami-Dade County, and other appropriate jurisdictions shall establish and implement mechanisms for on-going coordination and communication, to ensure the adequate provision of public educational facilities.*

**Policy 1.7.1**

The City shall coordinate and cooperate with Miami-Dade County Public Schools, Miami-Dade County, the state, municipalities and other appropriate agencies to develop or modify rules and regulations in order to simplify and expedite proposed new educational facility developments and renovations.

**Policy 1.7.2**

The location of future educational facilities should occur where capacity of other public facilities and services is available to accommodate the infrastructure needs of the educational facility; as such, the City shall encourage Miami-Dade County Schools to plan new facilities in such locations.

**Policy 1.7.3**

Miami-Dade County Public Schools should coordinate school capital improvement plans with the planned capital improvement projects of other County and municipal agencies, including the City of Miami Springs.

**Policy 1.7.4**

The City and Miami-Dade County shall cooperate with Miami-Dade County Public Schools in its efforts to ensure that they are not obligated to pay for off-site infrastructure in excess of their fair share of the costs.

**Policy 1.7.5**

The City and Miami-Dade County Public Schools shall periodically review the Educational Facilities Impact Fee Ordinance in an effort to ensure that the full eligible capital costs associated with the development of public school capacity (new schools and expansion of existing ones) are identified when updating the impact fee structure. Pursuant to the terms of the state mandated Interlocal Agreement, the County and School Board shall annually review the Ordinance, its formula, the Educational Facilities Impact Fee methodology and technical report, in order to make recommendations for revisions to the Board of County Commissioners.

**Policy 1.7.6**

Miami Springs and Miami-Dade County Public Schools shall annually review the Public Education Facilities Element and the City shall make amendments, as necessary.

**Policy 1.7.7**

The City shall coordinate with Miami-Dade County Public Schools in formalizing criteria for appropriate sharing of responsibility for required off-site facility improvements attributable to construction of new public schools or expansion of existing ones. The criteria should be prepared prior to the next full review of the School Impact Fee Ordinance.

**Policy 1.7.8**

The City shall coordinate with Miami-Dade County Public Schools, Miami-Dade County, and appropriate local governments and agencies to eliminate infrastructure deficiencies surrounding existing school sites.

**Policy 1.7.9**

The City shall coordinate efforts with Miami-Dade County Public Schools and Miami-Dade County to ensure the availability of adequate sites for required educational facilities.

**Policy 1.7.10**

The City in conjunction with Miami-Dade County Public Schools and Miami-Dade County shall coordinate the appropriate roles and responsibilities of affected governmental jurisdictions in ensuring the timely, orderly and efficient provision of adequate educational facilities.

**Policy 1.7.11**

Miami Springs shall consider the infrastructure needs of new, planned or expanded educational facilities when formulating and implementing its own capital improvement plans.

## **MONITORING AND EVALUATION PROGRAM**

This section will outline the procedures for the monitoring and evaluating of the Public Education Facilities Element and its implementation.

### **Monitoring Requirements**

The primary mechanism to monitor progress in achieving the objectives and policies in this Element is the collection and update of appropriate baseline data. Further, as required by the State Requirements for Educational Facilities, at least once every five years the School Board shall arrange for an educational plant survey to be conducted. This plant survey will include data regarding existing facilities and a five-year projection of student Population.

The written report from this survey shall include the following:

1. Inventory – An inventory of existing ancillary and educational plants and auxiliary facilities.
2. Student Population – An analysis of past and projected student population.
3. Capital Outlay – An analysis of expenditures and projected capital outlay funds.
4. Facilities – Statements of proposed types of facilities, grade structure, and list student capacity.
5. Funding – A proposed funding plan.

The information obtained from the educational plant survey will be used to generally monitor the progress of the objectives and policies contained in the Public Education Facilities Element and will provide specific indicators for Objective 1.1 and Objective 1.4.

The enforcement or adoption of interlocal agreements shall be explored as a means to help implement components of the Public Education Facilities Element, and to coordinate the efficient provision of public educational facilities. The performance of any agreements related to objectives of this element will be monitored as they are set in place.

**Objective 1.1** policies relating to the maintenance and improvement of specific level of service (LOS) for public educational facilities, as specified in the Educational Facilities Impact Fee Ordinance, shall be reviewed annually. Each year, Miami-Dade County Public Schools will compare the official enrollment of the school system with the number of student stations available to determine the current operating LOS.

**Objective 1.2** shall be measured through an annual review of the latest adopted Miami-Dade County Public Schools Facility Work Program to determine if the adopted concurrency level of service standard is being achieved. The number of development orders approved, those disapproved and those that have achieved LOS standards through mitigation options will also be reviewed.

**Objective 1.3** shall be monitored through the Miami-Dade County Public Schools' annual inventory and assessment of School Board owned property. The number of new sites shall be reported annually and in the full review period reported in the EAR.

**Objective 1.4** shall be monitored through the review and analysis of the statistics relating to school safety, as compiled annually, by Miami-Dade County Public Schools' Division of Police. A review and analysis of new and existing reactive and proactive safety and crime prevention programs will also be conducted on an annual basis.

**Objective 1.5** shall be monitored by Miami-Dade County Public Schools by reporting and reviewing the progress and number of new and existing community-oriented programs, including an enrollment analysis, by age and ethnicity, of adult, community and vocational programs.

**Objective 1.6** shall be monitored by Miami-Dade County Public Schools by reporting the number of educational facility enhancements such as media centers, art/music suite, and science laboratories.

**Objective 1.7** shall be addressed by implementing and tracking the development of appropriate mechanisms, including interlocal agreements and coordination efforts, which serve to expedite the provision or enhancement of public educational facilities.

Monitoring methods may be added or deleted as circumstances and criteria evolve. Any significant modifications to the monitoring process will be dealt with, as appropriate, through the comprehensive plan amendment process.

### **Evaluation**

Available data regarding the various public educational facilities will be used to assess progress on specific objectives. In order to evaluate the level of service being provided, student capacity totals will be reviewed in comparison to student enrollment to determine the status of the current level of service being provided. Similarly, performance in terms of achieving other objectives can also be analyzed by tracking the number of completed capital projects, as well as the development and implementation of other programs associated with each objective. Results of these calculations and measures will be analyzed and changing circumstances and opportunities will be considered.

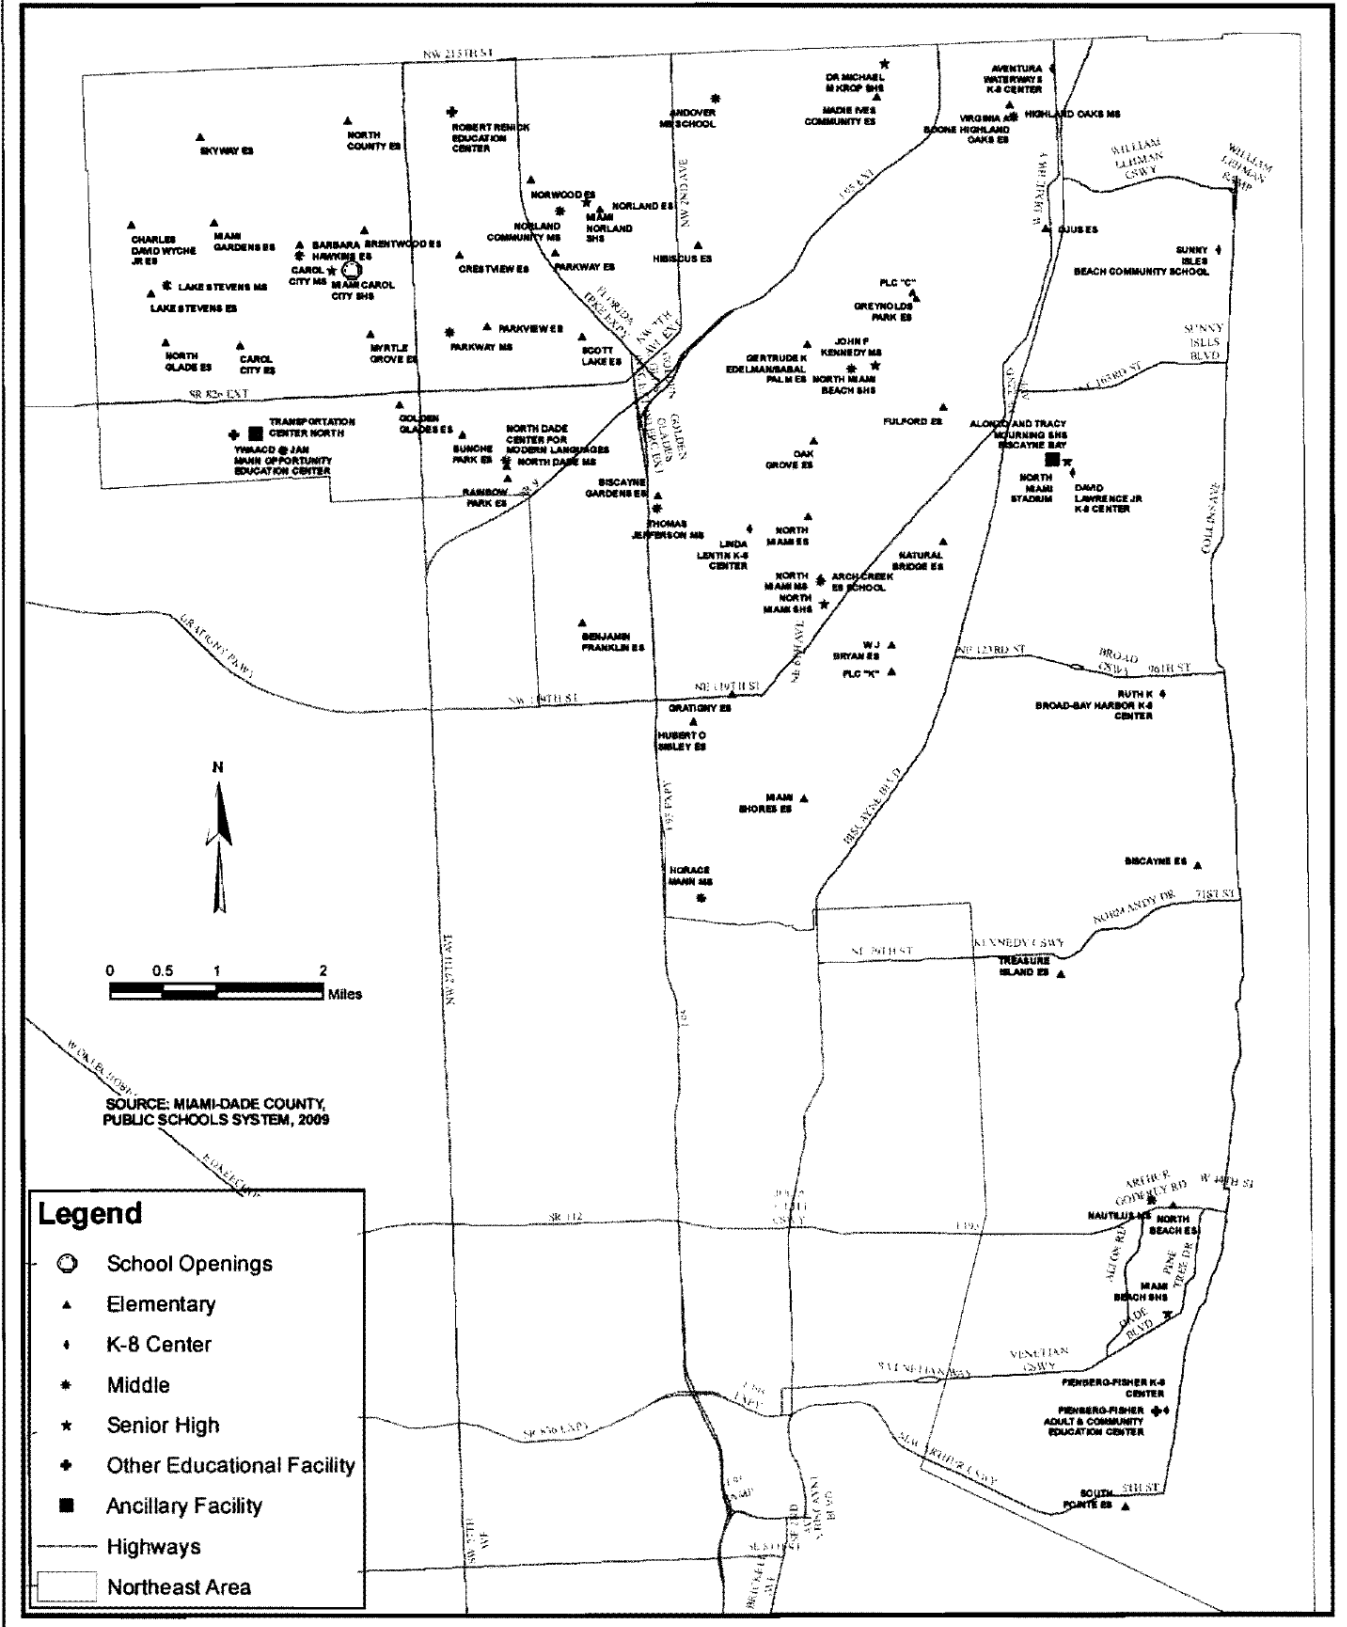

Any actions, changes or modifications to the Goal, Objectives, and Policies will be explained in accordance with the results of this process of continued monitoring and evaluation. Any necessary changes will be made through the comprehensive plan amendment process.

### **Future Conditions Maps**

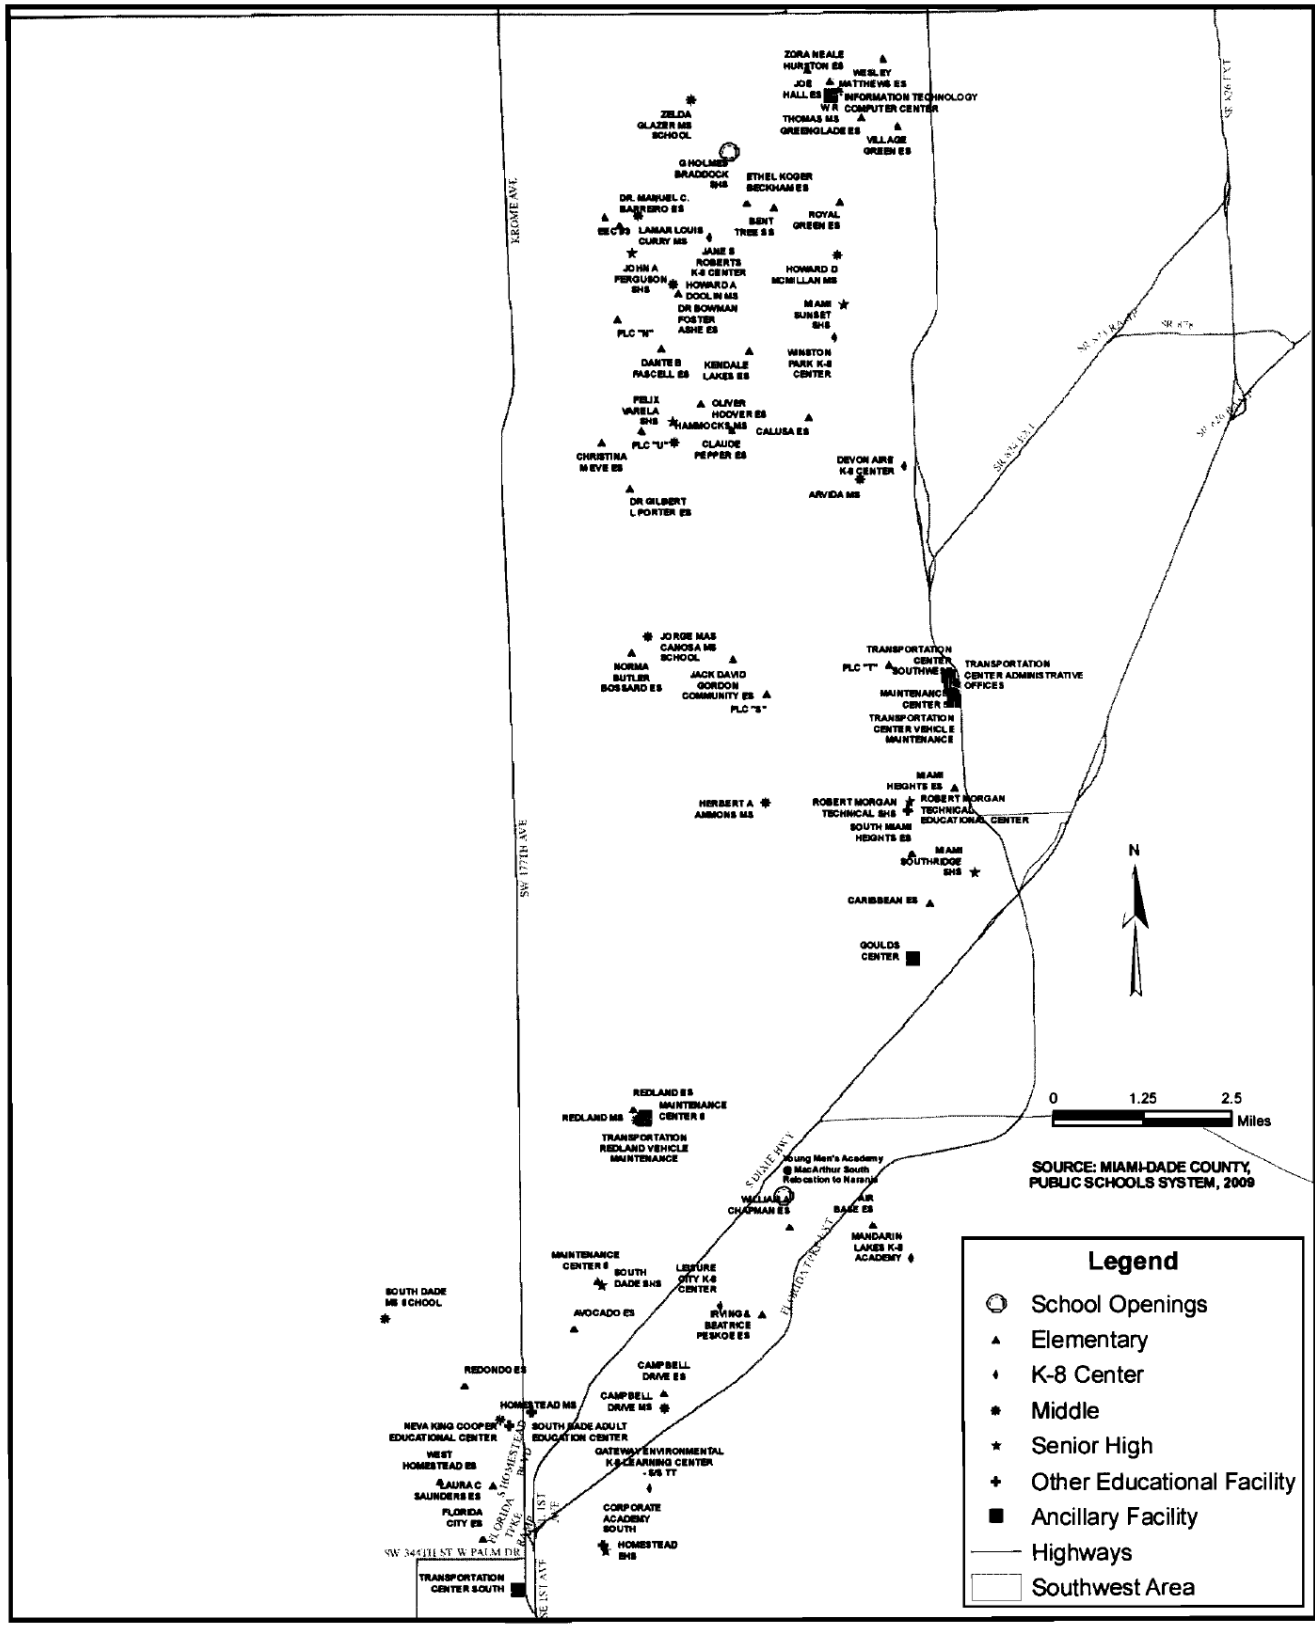

Consistent with Section 163.3177(12)(g), Florida Statutes, maps showing existing and future conditions are included in the element. A map series (Figures 1A through 1D) has been included, which indicates the location of public schools and ancillary facilities over the planning period (2009 through 2014). Public schools are depicted using four areas of Miami-Dade County that are generally equivalent to the proposed Educational Impact Fee Benefit District. Figures 1A through 1D indicate the current public school and ancillary facility locations and the location of public school and ancillary facilities anticipated by December 31, 2014. Map locations of future public school facilities are general and do not prescribe a land use on a particular parcel of land.

**Figure 1D - Proposed, Existing, and Ancillary Educational Facilities Located in the Southeast Area - 2009-2014**

## **PROPERTY RIGHTS ELEMENT**

**Goal 1**      **THE CITY OF MIAMI SPRINGS WILL MAKE DECISIONS WITH RESPECT FOR PROPERTY RIGHTS AND WITH RESPECT FOR PEOPLE’S RIGHTS TO PARTICIPATE IN DECISIONS THAT AFFECT THEIR LIVES AND PROPERTY.**

**Objective 1.1** The City of Miami Springs will respect judicially acknowledged and constitutionally protected private property rights.

### **Policy 1.1.1**

The City of Miami Springs will consider in its decision-making the right of a property owner to physically possess and control his or her interests in the property, including easements, leases, or mineral rights.

### **Policy 1.1.2**

The City of Miami Springs will consider in its decision-making the right of a property owner to use, maintain, develop, and improve his or her property for personal use or for the use of any other person, subject to state law and local ordinances.

### **Policy 1.1.3**

The City of Miami Springs will consider in its decision-making the right of the property owner to privacy and to exclude others from the property to protect the owner’s possessions and property.

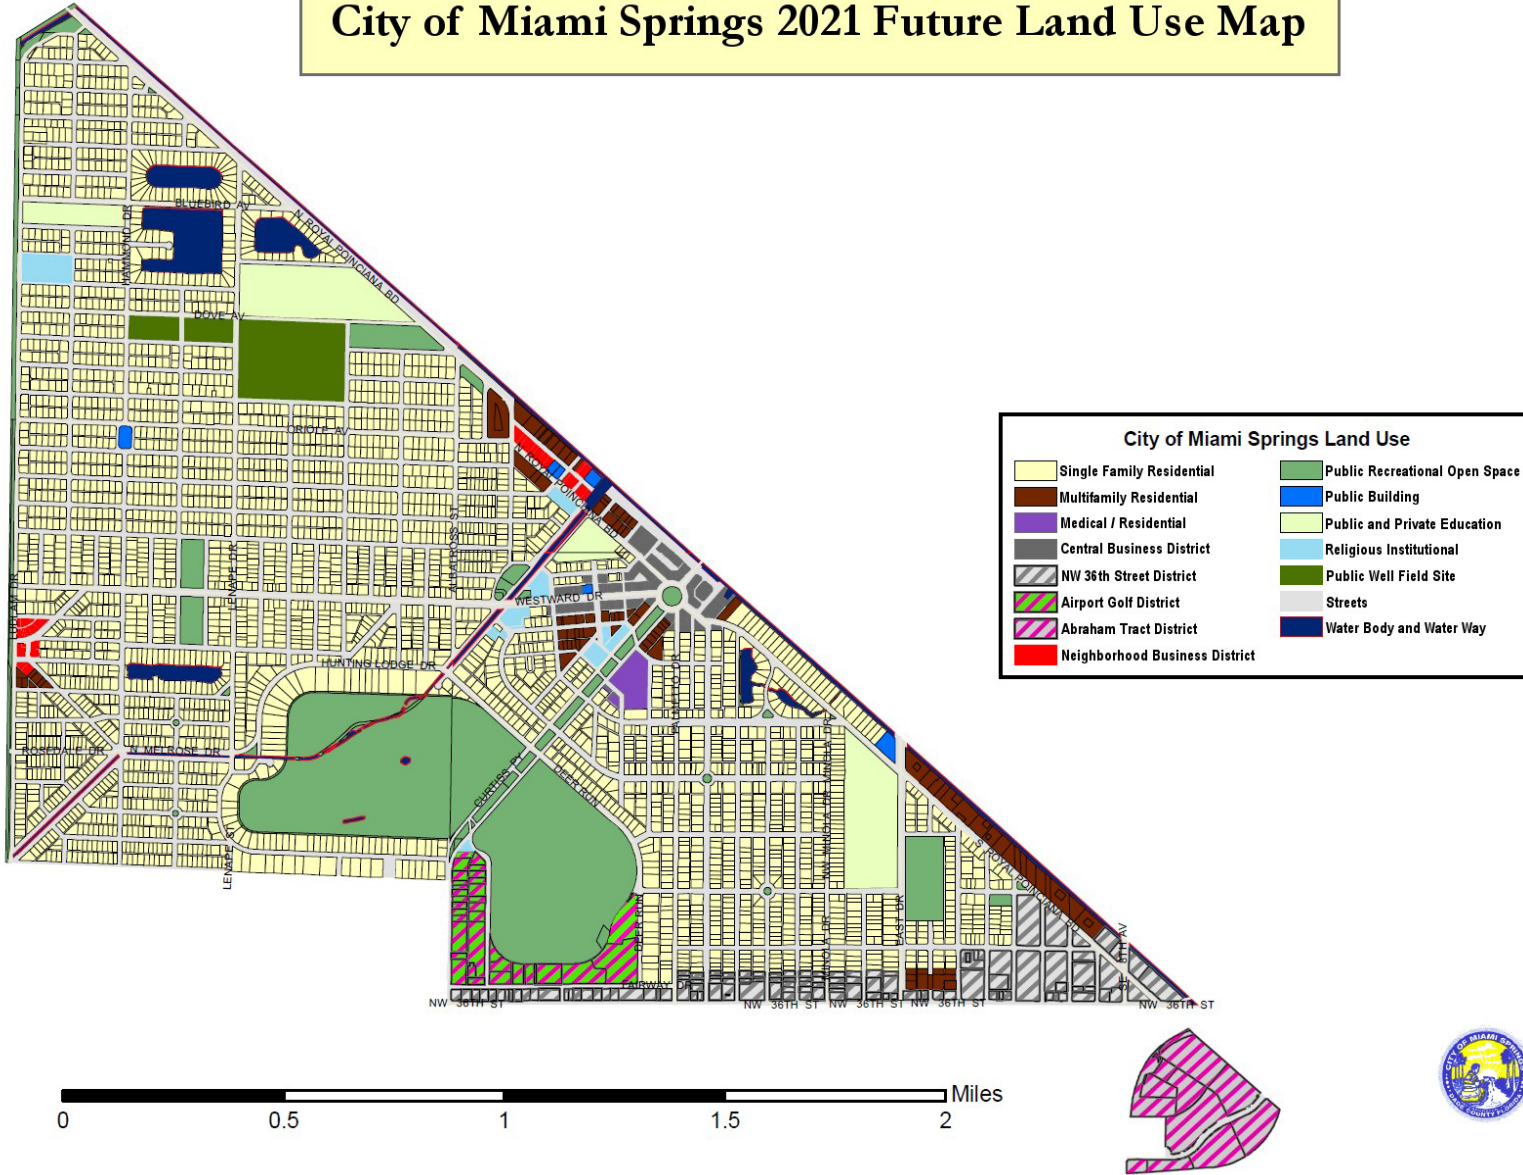

### **Policy 1.1.4**

The City of Miami Springs will consider in its decision-making the right of a property owner to dispose of his or her property through sale or gift.

 3) FEC CANAL; 4) LAKE LOUISE; 5) MIAMI RIVER  
 CANAL; 6) SOUTH BASS LAKE; 7) UNNAMED WATE  
 BODY; 8) UNNAMED WATER BODY; 9) UNNAMED  
 WATER BODY; 10) SOUTH SIDE CANAL.

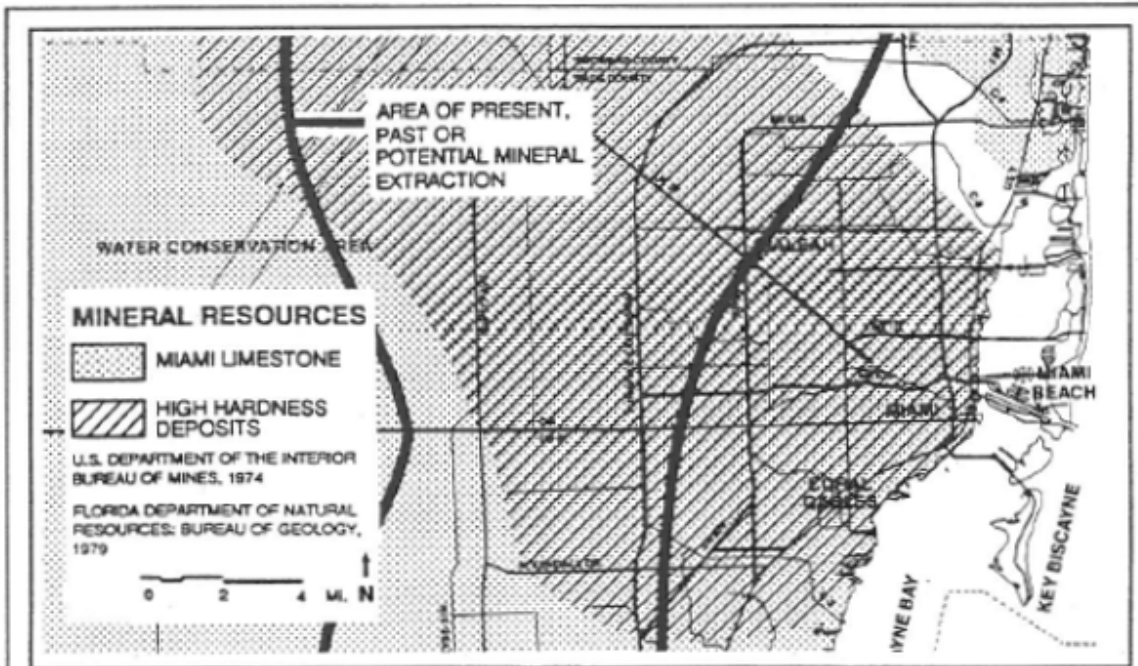

**FLOODPLAINS:** FLOODPLAINS ARE DEPICTED AS FLO  
 ZONES FROM THE FEMA RATE MAPS. THE FEMA LEGEN  
 IS SHOWN BELOW.

**HARBORS AND WETLANDS:** THERE ARE NO HARBO  
 OR KNOWN WETLANDS OF SIGNIFICANT SIZE IN MIAMI  
 SPRINGS.

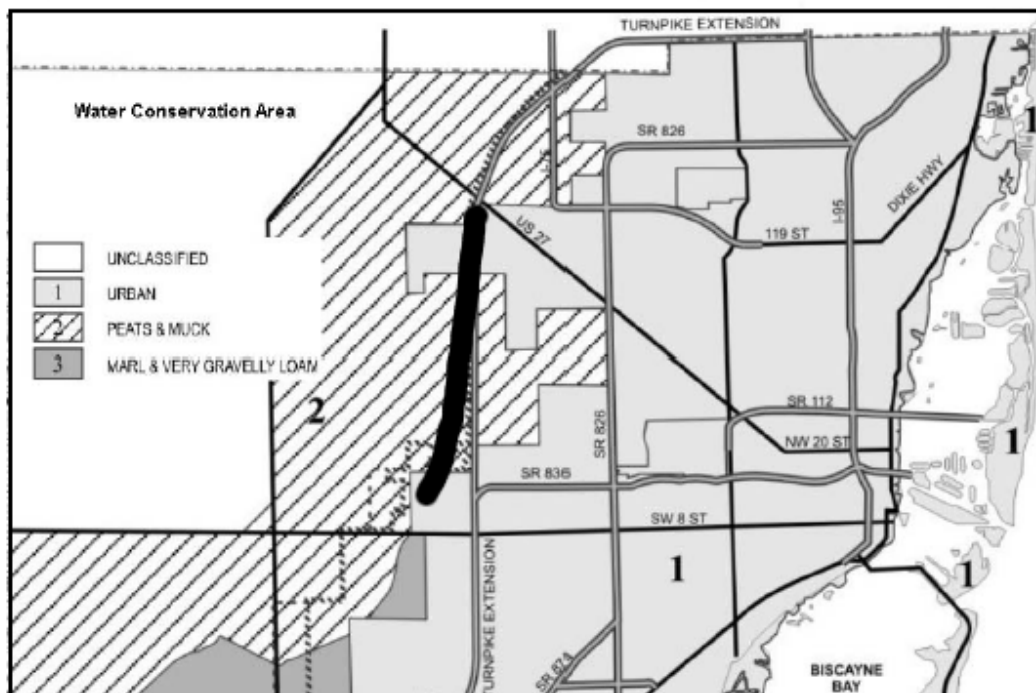

**LEGEND**

	<b>SPECIAL FLOOD HAZARD AREAS INUNDA        TED BY 100-YEAR FLOOD</b>
ZONE A	Area flood elevations determined.
ZONE AE	Base flood elevations determined.
ZONE AH	Flood depths of 1 to 3 feet (average) areas of existing levee flood elevations determined.
ZONE AO	Flood depths of 1 to 3 feet (average) areas from an existing transient average depths deter- mined. For areas of shallow fan flooding, velocities and direction.
ZONE A99	To be protected from 100-year flood by Federal flood protection system under con- struction; no base flood elevations deter- mined.
ZONE V	Coastal flood with velocity hazard levee ex- istent; base flood elevations determined.
ZONE VE	Coastal flood with velocity hazard levee ex- istent; base flood elevations determined.
	<b>FLOODWAY AREAS IN ZONE AE</b>
	<b>OTHER FLOOD AREAS</b>
ZONE I	Areas of 100-year flood elevations of less than 1 foot or with average areas less than 1 square mile; and areas protection by levees from 100-year flood.
	<b>OTHER AREAS</b>
ZONE E	Areas determined to be outside 100-year floodplain.
ZONE D	Areas in which flood hazards are undeter- mined.
